Common Casting Defects Defect Analysis And Solution:

Casting Design and Performance, 2009 *Nanotechnologies in Green Chemistry and Environmental Sustainability*

Samsul Ariffin Abdul Karim, 2022-12-09 Nanotechnologies represent a fast growing market and this unique volume highlights the current studies in applied sciences on sustainability of green science and technology The chapters include modelling machine learning nanotechnology nanofluids nanosystems smart materials and applications and solar and fuel cells technology The authors cover simulation additive manufacturing machine learning and the autonomous system Various aspects of green science as well as trans disciplinary topics between fundamental science and engineering are presented The book is suitable for all postgraduates and researchers working in this rapid growing research area Features Presenting latest research on green materials and sustainability Provide in depth discussion on modeling and simulation using latest techniques Technical exposure for the readers on additive manufacturing principles Numerous examples on nanofluids and nano technology are presented Discusses computer modeling superconductivity nanotubes and related structures such as graphene

Data-Driven Optimization of Manufacturing Processes Kalita, Kanak, Ghadai, Ranjan Kumar, Gao, Xiao-Zhi, 2020-12-25 All machining process are dependent on a number of inherent process parameters It is of the utmost importance to find suitable combinations to all the process parameters so that the desired output response is optimized While doing so may be nearly impossible or too expensive by carrying out experiments at all possible combinations it may be done quickly and efficiently by using computational intelligence techniques Due to the versatile nature of computational intelligence techniques they can be used at different phases of the machining process design and optimization process While powerful machine learning methods like gene expression programming GEP artificial neural network ANN support vector regression SVM and more can be used at an early phase of the design and optimization process to act as predictive models for the actual experiments other metaheuristics based methods like cuckoo search ant colony optimization particle swarm optimization and others can be used to optimize these predictive models to find the optimal process parameter combination These machining and optimization processes are the future of manufacturing Data Driven Optimization of Manufacturing Processes contains the latest research on the application of state of the art computational intelligence techniques from both predictive modeling and optimization viewpoint in both soft computing approaches and machining processes The chapters provide solutions applicable to machining or manufacturing process problems and for optimizing the problems involved in other areas of mechanical civil and electrical engineering making it a valuable reference tool This book is addressed to engineers scientists practitioners stakeholders researchers academicians and students interested in the potential of recently developed powerful computational intelligence techniques towards improving the performance of machining processes

Advances in Material Sciences and Engineering Mokhtar Awang, Seyed Sattar Emamian, Farazila Yusof, 2019-09-19

This book presents selected papers from the 4th International Conference on Mechanical Manufacturing and Plant

Engineering ICMMPPE 2018 which was held in Melaka Malaysia from the 14th to the 15th of November 2018 The proceedings discuss genuine problems concerning joining technologies that are at the heart of various manufacturing sectors In addition they present the outcomes of experimental and numerical works addressing current problems in soldering arc welding and solid state joining technologies

Principles of Metal Casting, Third Edition Mahi Sahoo, Sam Sahu, 2014-06-05 The definitive metal casting resource fully updated Written by prominent industry experts Principles of Metal Casting Third Edition addresses the latest advances in the field such as melting casting processes sand systems alloy development heat treatment and processing technologies New chapters cover solidification modeling casting defects and zinc and zinc alloys Detailed photographs illustrations tables and equations are included throughout Ideal for students and researchers in metallurgy and foundry science as well as foundry industry professionals this authoritative guide provides all of the information needed to produce premium quality castings Comprehensive coverage includes Patterns Casting processes Solidification of metals and alloys Gating and risering of castings Casting process simulation Aluminum and aluminum alloys Copper and copper alloys Magnesium and magnesium alloys Zinc and zinc alloys Cast irons Steel castings Cleaning and inspection Casting defects
