

Wave Recognition

A pair of pattern-recognition cards is used orally. The sequence combinations they pass through (including and excluding the observed) patterns. Individual combinations are given. Students produce the corresponding combinations. Make a similar recognition for different patterns that will produce. Use the same sets of patterns. They are identified & distinguished.

The grid consists of 10 rows of pattern-recognition cards. Each row contains two cards with wave patterns on a dotted background. The patterns are combinations of three waves: a square wave, a triangular wave, and a sine wave. The patterns are arranged in a 2x5 grid. A small diagram of a car is on the right side of the grid.
