Questions Veneeta Dayal, 2016 This book synthesizes and integrates 40 years of research on the semantics of questions and its interface with pragmatics and syntax conducted within the formal semantics tradition. A wide range of topics are covered including weak strong exhaustiveness, maximality, functional answers, single multiple trapped list answers, embedding, predicates, quantificational variability, concealed questions, weak islands, polar and alternative questions, negative polarity and non canonical questions. The literature on this rich set of topics, theoretically diverse and scattered across multiple venues, is often hard to assimilate. Veneeta Dayal, drawing on her own research, brings them together for the first time in a coherent, concise and well structured whole. Each chapter begins with a non technical introduction to the issues discussed, semantically sophisticated accounts are then presented incrementally with the major points summarized at the end of each section. Written in an accessible style, this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing. It will be a unique resource for the novice and expert alike and seeks to appeal to a variety of readers without compromising depth and breadth of coverage.
