Multiple Choice Questions Fundamental And Technical:

Fundamentals of Modern Manufacturing Mikell P. Groover, 2010-01-07 Engineers rely on Groover because of the book's quantitative and engineering oriented approach that provides more equations and numerical problem exercises. The fourth edition introduces more modern topics including new materials processes and systems. End of chapter problems are also thoroughly revised to make the material more relevant. Several figures have been enhanced to significantly improve the quality of artwork. All of these changes will help engineers better understand the topic and how to apply it in the field.

Engineer, 1976 *Study Guide to Accompany Fundamentals of Management* Kim Stewart, 1987 **Threshold Concepts Within the Disciplines** Ray Land, Jan Meyer, Jan Smith, 2008 *Threshold Concepts within the Disciplines* brings together leading writers from various disciplines and national contexts in an important and readable volume for all those concerned with teaching and learning in higher education. The foundational principle of threshold concepts is that there are in each discipline conceptual gateways or portals that must be negotiated to arrive at important new understandings. In crossing the portal transformation occurs both in knowledge and subjectivity. Such transformation involves troublesome knowledge, a key concern for contributors to this book who identify threshold concepts in their own fields and suggest how to deal with them. Part One extends and enhances the threshold concept framework containing chapters that articulate its qualities, its links to other social theories of learning and other traditions in educational research. Part Two encompasses the disciplinary heart of the book with contributions from a diversity of areas including computing, engineering, biology, design, modern languages, education and economics. In the many empirical case studies, educators show how they have used the threshold concept framework to inform and evaluate their teaching contexts. Other chapters emphasise the equally important being and becoming dimension of learning. Part Three suggests pedagogic directions for those at the centre of the education project with contributions focusing on the socialisation of academics and their continuing quest to be effective teachers. The book will be of interest to disciplinary teachers, educational researchers and educational developers. It also is of relevance to issues in quality assurance and professional accreditation.
