Research Methods In Human Rights A Handbook:

Research Methods in Human Rights Bård A. Andreassen, Claire Methven O'Brien, Hans-Otto Sano, 2024-05-02 In this thoroughly revised second edition editors Bård A. Andreassen, Claire Methven O'Brien and Hans-Otto Sano advance contemporary discussions on human rights methodology bringing together an array of leading scholars to offer instruction and guidance on the methodological approaches to human rights research

Research Methods for International Human Rights Law Damian Gonzalez-Salzberg, Loveday Hodson, 2019-06-13 The study and teaching of international human rights law is dominated by the doctrinal method. A wealth of alternative approaches exists but they tend to be discussed in isolation from one another. This collection focuses on cross-theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field. As such it provides a coherent, accessible and diverse account of key theories and methods. A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies. By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method. Furthermore, since every contribution follows the same uniform structure, this allows for fruitful comparison between different approaches to the study of our discipline

Advanced Introduction to Legal Research Methods Ernst H. Ballin, 2020-10-30 Written by Ernst Hirsch Ballin, this original *Advanced Introduction* uncovers the foundations of legal research methods, an area of legal scholarship distinctly lacking in standardisation. The author shows how such methods differ along critical empirical and fundamental lines and how our understanding of these is crucial to overcoming crises and restoring trust in the law. Key topics include a consideration of law as a normative language and an examination of the common objects of legal research

Research Methods for Environmental Psychology Robert Gifford, 2016-01-19 Covering the full spectrum of methodology, the timely and indispensable *Research Methods for Environmental Surveys* surveys the research and application methods for studying changing and improving human attitudes, behaviour and well-being in relation to the physical environment. The first new book covering research methods in environmental psychology in over 25 years, it brings the subject completely up to date with coverage of the latest methodology in the field. The level of public concern over the impact of the environment on humans is high, making this book timely and of real interest to a fast-growing discipline. Comprehensively surveys the research and application methods for studying changing and improving human attitudes, behavior and well-being in relation to the physical environment. Robert Gifford is internationally recognised as one of the leading individuals in this field and the contributors include many of the major leaders in the discipline
