Making Learning-Centred Teaching Work in Asia and Beyond Lynette Tan, Daniel Jew, Phyllis Blumberg, 2025-11-28 This book guides readers to transition their teaching to learning centred practices. Based on Weimer's 2002 2013 and Blumberg's 2009 2019 framework the authors describe their faculty learning community based journey through the adaptation implementation and assessment of a series of practical learning centred teaching strategies. While furnishing a critical discussion of challenges directions and development of learning centred pedagogy as applied to an Asian context this book provides suggested pathways for educators around the world to embark on their own journey toward learning centred teaching. These pathways cover a range of disciplines and teaching contexts from architecture and engineering to systems thinking and general education illustrating the robustness and flexibility of learning centred teaching. The authors provide examples of good teaching practice to help instructors instructional designers faculty developers and university administrators see how principles of learning centred teaching and assessment can translate practically into quality classroom teaching and learning. The rigorous assessment methodology is both highly reflective and readily applicable to teaching assessment and portfolio development. It also shows how Blumberg's 2019 rubrics and Cole Stavros 2019 SOAR Strengths Opportunities Aspirations and Results framework can be used to evaluate the impact of interventions. Contributing unique insights this is a valuable guide for anyone interested in implementing student learning centred pedagogical approaches and using rubrics for assessing teaching practice.

Understanding Interaction in the Second Language Classroom Context Noriko Iwashita, Phung Dao, Mai Xuan Nhat Chi Nguyen, 2025-03-07 This book provides an overview and analysis of the role that classroom interaction plays in instructed second language acquisition. The authors synthesise current state of the art research on how classroom interaction benefits L2 learning through the lens of three theoretical perspectives: cognitive interactionist with a focus on how conversational interaction may promote L2 processing and learning; sociocultural which assumes that cognitive advances are located within social interaction and language socialisation which examines how learners position themselves and are positioned in social

interaction and how they establish their membership in the target language community They go on to critically examine how findings from this research can be applied to classroom practice in diverse L2 settings they then provide pedagogical implications and suggested teaching activities to support L2 teachers and teacher educators in harnessing the benefits of classroom interaction for L2 learning
