Computer Architecture Joseph D. Dumas II, 2016-11-25 Not only does almost everyone in the civilized world use a personal computer smartphone and or tablet on a daily basis to communicate with others and access information but virtually every other modern appliance vehicle or other device has one or more computers embedded inside it One cannot purchase a current model automobile for example without several computers on board to do everything from monitoring exhaust emissions to operating the anti lock brakes to telling the transmission when to shift and so on Appliances such as clothes washers and dryers microwave ovens refrigerators etc are almost all digitally controlled Gaming consoles like Xbox PlayStation and Wii are powerful computer systems with enhanced capabilities for user interaction Computers are everywhere even when we don't see them as such and it is more important than ever for students who will soon enter the workforce to understand how they work This book is completely updated and revised for a one semester upper level undergraduate course in Computer Architecture and suitable for use in an undergraduate CS EE or CE curriculum at the junior or senior level Students should have had a course s covering introductory topics in digital logic and computer organization While this is not a text for a programming course the reader should be familiar with computer programming concepts in at least one language such as C C or Java Previous courses in operating systems assembly language and or

systems programming would be helpful but are not essential
