**Handbook of Career Development** Gideon Arulmani, Anuradha J. Bakshi, Frederick T. L. Leong, A. G. Watts, 2014-02-08  
This book is focused on work occupation and career development themes that are fundamental to a wide range of human activities and relevant across all cultures. Yet theorizing and model building about this most ubiquitous of human activities from international perspectives have not been vigorous. An examination of the literature pertaining to career development counseling and guidance that has developed over the last fifty years reveals theorizing and model building have been largely dominated by Western epistemologies. Some of the largest workforces in the world are in the developing world. Career guidance is rapidly emerging as a strongly felt need in these contexts. If more relevant models are to be developed, frameworks from other cultures and economies must be recognized as providing constructs that would offer a deeper understanding of career development. This does not mean that existing ideas are to be discarded. Instead, an integrative approach that blends universal principles with particular needs could offer a framework for theorizing research and practice that has wider relevance. The central objective of this handbook is to draw the wisdom and experiences of different cultures together to consider both universal and specific principles for career guidance and counseling that are socially and economically relevant to contemporary challenges and issues. This book is focused on extending existing concepts to broader contexts as well as introducing new concepts relevant to the discipline of career guidance and counseling.

**Career Programming: Linking Youth to the World of Work** Kathryn Hynes, Barton J. Hirsch, 2012-07-17  
Across education, out-of-school time programming, and workforce development, researchers and practitioners are seeking ways to bolster the career readiness of our nation's youth, particularly low-income youth. This issue brings together information from a variety of disciplines and fields to help researchers, practitioners, and policymakers understand what we know and need to learn to provide youth with effective, engaging, career-related programming. The articles highlight key findings about how youth learn about careers and develop a vocational identity, whether adolescent employment is beneficial for youth, and how to align our various systems to promote positive youth development. Models of career programming from education, afterschool, and workforce development are highlighted, as are strategies for collaborating with businesses. The volume emphasizes the practical implications of research findings, keeping the focus on how to develop evidence-based practices to support career development for youth. This is the 134th volume of *New Directions for Youth Development*, the Jossey-Bass quarterly report series dedicated to bringing together everyone concerned with helping young people, including scholars, practitioners, and people from different disciplines and professions.

**Global Youth Development Index and Report 2016** Commonwealth Secretariat, 2016-10-21  
There are more young people in the world today than ever before. Yet surprisingly little is known about the current state of affairs in youth development. Measuring the well-being of young people continues to be a challenge, even though its importance is widely recognized. The Commonwealth's youth flagship report, the *Global Youth Development*

Index and Report provides an evidence based overview of the state of development for the nearly 1.8 billion young people between the ages of 15 and 30 in the world. The Youth Development Index (YDI) is a composite index of 18 indicators that collectively measure progress on youth development in 183 countries including 49 of the 53 Commonwealth countries. The YDI has five domains measuring levels of education, health and well-being, employment and opportunity, political participation and civic participation among young people.

**Youth Voice and Participatory Arts in Global Development**  
The May Group, 2025-02-17  
Youth Voice and Participatory Arts in Global Development looks at how arts based methods can promote youth voice and engagement in global development. This book argues that engaging young people's diverse voices, ideas and knowledges in matters that affect them is vital in enabling young people to become and be recognised as active citizens, developing more inclusive societies and ensuring that development programmes remain accountable to the young people they aim to benefit. We draw on youth led participatory research projects from across Africa, Asia, Europe and Latin America which used a range of art forms and engagement mechanisms including participatory filmmaking, street art and the intersection of formal and non formal education. Through this process we develop the conceptualisation of transnational voice for epistemic justice and demonstrate the unique role that arts based methods play in enabling this broad conceptualisation of voice that accounts for the multiple dimensions of young people's knowledges and experiences. This book will be of interest to researchers within international development, arts and youth studies as well as to development practitioners and anyone interested in promoting epistemic justice with and for young people.

**Contemporary Theories of Career Development**  
Nancy Arthur, Mary McMahon, 2018-11-12  
In response to the complexities of social change that have become evident in the 21st century there is a need for innovation in career theory that takes into account new perspectives and the fluctuating contexts of people's lives. Contemporary Theories of Career Development: International Perspectives brings together the contributions of theorists from around the globe whose work represents current cutting edge international approaches to career development theory. Emphasizing the new perspectives that are needed for this field to be relevant in a contemporary era, this book considers the cultural applications of theory in a diverse range of populations. Structured in three parts with chapters written by internationally renowned leaders in the field, this collection features a critical examination of the current history of the field, thirteen theory chapters each enhanced by a case study and a final chapter that draws the previous chapters together through key themes, broadening the reader's knowledge of theoretical perspectives and their interrelations. Each theory chapter author comments on and critiques his or her own theory, inviting readers to engage with these theories at both a practical and theoretical level through the case studies. Detailed with reader friendly descriptions and supplemented by international research case examples and discussion questions, Contemporary Theories of Career Development: International Perspectives is the ideal reference work for students studying the topic as well as a stimulus for researchers and practitioners looking to implement the theories in their work.

**Global Employment Trends for Youth**

**2013** International Labour Office,2014-01-30 Incorporating the most recent labor market information available Global Employment Trends for Youth provides a detailed view of the youth labor market situation around the world It shows where progress has or has not been made updates world and regional indicators and provides detailed analyses of medium term trends in youth population labor force and employment and unemployment This year s report reveals that the youth employment crisis continues in developed as well as developing economies Little progress has been made in reducing youth unemployment in the advanced economies since the height of the economic crisis while in most developing regions youth unemployment rates are projected to remain at the same level or increase in the medium term Drawing on the results of school to work transition surveys the report shows that developing regions face major youth employment challenges relating to the quality of work

**The Social and Emotional Development of Gifted Children** Maureen Neihart,2021-09-23 The Social and Emotional Development of Gifted Children remains the only book that provides a comprehensive summary of the empirical research on the social and emotional development of gifted children by leading authorities in the field It includes several features that make it the leading text on what we know about the social and emotional development of gifted children For example it summarizes the most significant findings from the empirical research on the topic It also includes noteworthy variations that have been observed across cultural groups or global contexts Each chapter also provides a short description of the practical applications that can be made from the research This second edition includes an entirely new section on the psychosocial aspects of talent development as well as addresses the burgeoning interest and research base regarding gifted performance The text also includes several new topics that have emerged from the research in the past decade such as the neuroscience of talent development and motivation for talent development This book is a service publication of the National Association for Gifted Children

*Career builders* Sylvia Nassar,Aisha Al-Qimlass,2017-09-27 Global youth unemployment is a significant cause of poverty resulting in the persistent marginalization of populations Education and career counseling professionals and professionals in policy research and practice concur that the consequences of global youth unemployment are dire But leaders in these domains have not yet come to an agreement on the best ways to face this global challenge Our analysis of interdisciplinary literature on global youth unemployment is a first step in identifying and formalizing best practices for culturally appropriate career and workforce development worldwide This research will support education and career counseling professionals in developing appropriate career and psychosocial support interventions establishing empirical intervention efficacy and other program evaluation protocols and creating a capacity building infrastructure for knowledge sharing across policy research and practitioner stakeholder groups We also include a proposal for next steps to establish rigorous empirical support for these future initiatives
