

Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the first lecture, *Foundations of Cooling Theory*. These are generalised and give insights on problems for all of the cooling gases, from the perspective of the results on the lecture, the likely contribution to Cooling Theory and the needs of students and their supervisors at the University of Cambridge. I also used several other sources for additional material, such as Part II course book of Cambridge on Cooling Theory and Thermodynamics given by Professor John Kestin, and the first paper given there in Cambridge that on Sublimation Thermodynamics given by Professor Eric Gillman. I also included some more recent work in 2023 course, Applied Maths for the Phys. Scientists, the last version of the notes is based on that course's course notes, "Thermodynamic Cooling".

All credits go to those who did my best!
