Diefenderfer, Roger B. Nelsen, 2010-12-31 *The Calculus Collection* is a useful resource for everyone who teaches calculus in high school or in a 2 or 4 year college or university It consists of 123 articles selected by a panel of six veteran high school teachers each of which was originally published in *Math Horizons* *MAA Focus* *The American Mathematical Monthly* *The College Mathematics Journal* or *Mathematics Magazine* The articles focus on engaging students who are meeting the core ideas of calculus for the first time *The Calculus Collection* is filled with insights alternate explanations of difficult ideas and suggestions for how to take a standard problem and open it up to the rich mathematical explorations available when you encourage students to dig a little deeper Some of the articles reflect an enthusiasm for bringing calculators and computers into the classroom while others consciously address themes from the calculus reform movement But most of the articles are simply interesting and timeless explorations of the mathematics encountered in a first course in calculus **The College Mathematics Journal**, 1997 **Proofs Without Words III** Roger B. Nelsen, 2015-12-31 Proofs without words PWWs are figures or diagrams that help the reader see why a particular mathematical statement is true and how one might begin to formally prove it true PWWs are not new many date back to classical Greece ancient China and medieval Europe and the Middle East PWWs have been regular features of the MAA journals *Mathematics Magazine* and *The College Mathematics Journal* for many years and the MAA published the collections of PWWs *Proofs Without Words Exercises in Visual Thinking* in 1993 and *Proofs Without Words II More Exercises in Visual Thinking* in 2000 This book is the third such collection of PWWs *Compilation of Research on College Mathematics Education* Marilyn N. Suydam, 1975 **Proofs Without Words II** Roger B. Nelsen, 2020-02-22 Like its predecessor *Proofs without Words* this book is a collection of pictures or diagrams that help the reader see why a particular mathematical statement may be true and how one could begin to go about proving it While in some proofs without words an equation or two may appear to help guide that process the emphasis is clearly on providing visual clues to stimulate mathematical thought The proofs in this collection are arranged by topic into five chapters geometry and algebra trigonometry calculus and analytic geometry inequalities integer sums and sequences and series Teachers will find that many of the proofs in this collection are well suited for classroom discussion and for helping students to think visually in mathematics 1970-1994 Topic Index of The College Mathematics Journal Donald E. Hooley, 1994\* New Directions in Two-Year College Mathematics Donald J. Albers, Stephen B. Rodi, Ann E. Watkins, 2012-12-06 by Donald J. Albers ix INTRODUCTION In July of 1984 the first national conference on mathematics education in two year colleges was held at Menlo College The conference was funded by the Alfred P Sloan Foundation Two year colleges account for more than one third of all undergraduate enrollments in mathematics and more than one half of all college freshmen are enrolled in two

year colleges These two facts alone suggest the importance of mathematics education in two year colleges particularly to secondary schools four year colleges and universities For a variety of reasons four year colleges and universities are relatively unaware of two year colleges Arthur Cohen who was a participant at the New Directions conference warns Four year colleges and universities ignore two year colleges at their own peril Ross Taylor another conference participant encouraged two year college faculty to be ever mindful of their main source of students secondary schools and to work hard to strengthen their ties with them There are many other reasons why it was important to examine two year college mathematics from a national perspective 1 Over the last quarter century no other sector of higher education has grown so rapidly as have two year colleges Their enrollments tripled in the 60 s doubled in the 70 s and continue to increase rapidly in the 80 s x 2 Twenty five years ago two year colleges accounted for only one seventh of all undergraduate mathematics enrollments today the fraction is more than one third
