Despite the variety of approaches the authors adopt they share an understanding of language as a dynamic and heterogeneous system mediating interaction in social and cultural contexts and explain how coherence and cohesion are reflected in different contextually bound aspects of human communication. The chapters of the book comprise essays by linguists working in the fields of pragmatics, discourse analysis and stylistics which explore features contributing to the perception of cohesion and coherence in spoken and written varieties of English, namely impromptu academic and political discourse within the former variety and media academic and fictional discourse within the latter. This volume which combines theoretical insights with practical analyses of different varieties of spoken and written English discourse will be of interest to a wide range of researchers, scholars and students of English.

Students without prior experience in discourse analysis will appreciate and understand the micro-macro relationship of language use in everyday contexts in professional and academic settings in languages other than English and in a wide variety of media outlets. Each chapter is supported by examples of spoken and written discourse from various types of data sources including conversations, commercials, university lectures, textbooks, print ads and blogs and concludes with hands-on opportunities for readers to actually do discourse analysis on their own. Students can also utilize the book's comprehensive companion website with flash cards for key terms, quizzes and additional data samples for in-class activities and self-study.
