*Qualitative Data* Carl Auerbach, Louise B. Silverstein, 2003-09 A necessary guide through the qualitative research process. Qualitative Data is meant for the novice researcher who needs guidance on what specifically to do when faced with a sea of information. It takes readers through the qualitative research process beginning with an examination of the basic philosophy of qualitative research and ending with planning and carrying out a qualitative research study. It provides an explicit step-by-step procedure that will take the researcher from the raw text of interview data through data analysis and theory construction to the creation of a publishable work. The volume provides actual examples based on the author's own work, including two published pieces in the appendix so that readers can follow examples for each step of the process from the project's inception to its finished product. The volume also includes an appendix explaining how to implement these data analysis procedures using NVIVO, a qualitative data analysis program.

**Archetypes of Crowdfunding Platforms** Florian Danmayr, 2013-12-04. Currently a new potential paragon of fundraising and financing in particular, crowd funding (CF) attracts a lot of attention. Basically, CF is an open call for capital, mainly via the internet, where the desired campaign can be evaluated and financially supported by a large group of individuals, the crowd. The matchmaking process between campaign creators and potential investors is mainly established by a standardized CF platform. Scientific discourse on CF is still nascent since existing studies and papers focus on the potential of CF and its basic principles. Florian Danmayr addresses crowd funding platforms as the object of his analysis and contributes to the body of literature by enhancing knowledge on the composition of the CFP market.
