Documenting Software Architectures Paul Clements, 2003 Architecture is crucial to the success of any large software system but even a superb architecture will fail if it isn't communicated well Now there's a language and notation independent guide to capturing architecture so it can be used successfully by every analyst software designer and developer The authors review the diverse goals and uses of software architecture documentation providing documentation strategies for several common scenarios They identify the basic unit of software architecture documentation the viewtype which specifies the type of information to be provided in an architectural view For each

viewtype Modules Component and Connectors and Allocation they offer detailed guidance on documenting what really matters Next they demonstrate how to package architecture documentation in coherent usable form augmenting architectural views with documentation of interfaces and behavior accounting for architectural variability and dynamic systems and more *Standards, Guidelines, and Examples on System and Software Requirements Engineering* Merlin
