**Circular Economy Realities** Pauline Deutz, Walter J.V. Vermeulen, Rupert J. Baumgartner, Tomás B. Ramos, Andrea Raggi, 2024-07-30 This book addresses the realities of the circular economy a resource

efficiency concept that has risen to global prominence in academic policy and business circles over the last decade. Considered an approach to sustainable growth, the volume critically analyses how sustainable emerging applications of a circular economy are in practice. The book stems from an international interdisciplinary project exploring the discourses, policies, implementation and impacts of the circular economy across public, private and third sector accounts. It draws on a wide range of case studies from the UK, Portugal, Austria, Italy, the Netherlands, France, Chile, China, Nigeria, Taiwan and Vietnam, highlighting how experiences both shaped and were shaped by the places in which they were happening. It provides a guide to researching a complex phenomenon such as a circular economy which involves both collaboration and competition between multiple stakeholders across different sectors and places. Synthesising the multiple perspectives employed in the project, the book makes recommendations for circular economy implementation in different contexts, including the assessment of sustainability implications whilst indicating the limited potential for circular economy activity to bring social and economic benefits without explicit motivation for those to happen. Benefitting from extensive empirical research, this critical assessment of sustainability in the context of the circular economy will appeal to a broad readership of academics, upper level students, practitioners and policy makers in sustainable development, business, economics, geography, sociology and environmental engineering.
