**Mathematical Knowledge and the Interplay of Practices** José Ferreirós, 2015-12-22 This book presents a new approach to the epistemology of mathematics by viewing mathematics as a human activity whose knowledge is intimately linked with practice Charting an exciting new direction in the philosophy of mathematics Jos Ferreir s uses the crucial idea of a continuum to provide an account of the development of mathematical knowledge that reflects the actual experience of doing math and makes sense of the perceived objectivity of mathematical results Describing a historically oriented agent based philosophy of mathematics Ferreir s shows how the mathematical tradition evolved from Euclidean geometry to the real numbers and set theoretic structures He argues for the need to take into account a whole web of mathematical and other practices that are learned and linked by agents and whose interplay acts as a constraint Ferreir s demonstrates how advanced mathematics far from being a priori is based on hypotheses in contrast to elementary math which has strong cognitive and practical roots and therefore enjoys certainty Offering a wealth of philosophical and historical insights *Mathematical Knowledge and the Interplay of Practices* challenges us to rethink some of our most basic assumptions about mathematics its objectivity and its relationship to culture and science

Taking a Hard Look Amanda Du Preez, 2009 It is the aim of this edited volume to take a hard look at gender and visual culture Gender and visual culture traverse in quite unique and often fascinating ways On the one hand gender functions as an interdisciplinary approach and critical tool to analyse and investigate several subject fields As such gender contributes to establishing a much needed theoretical and functional platform spanning across many fields of enquiry from where gender practices can effectively be critiqued and ideally changed On the other hand the growing popularity and ubiquity of visual culture in a global context create the increasing need to reflect on and interrogate this phenomenon in an academic manner Although Visual Culture Studies is an established subject at many Northern institutions it is fairly new and relatively under theorised in the South In response to the growing need to investigate issues dealing with gender and visual culture and particularly how they creatively intersect this selection of chapters first presented as papers at the Taking a Hard Look Gender and Visual Culture international conference 20-21 June 2007 Institute for Gender and Women TM s Studies University of Pretoria South Africa are collected here in the hope to make a purposeful contribution to the burgeoning discourse However by addressing the creative intersection between gender and visual culture this edited volume is no novelty In fact the topic of gender and visual culture has been addressed over the past decade in several edited volumes It is in this proud tradition that this book aims to take its place and to create a dialogue with international theory on gender and

visual culture studies from a South perspective Key questions that are explored in the volume What type of gendered visual culture is being presented and created in the South particularly but not exclusively How is visual culture gendered Can one refer to a move beyond gender in terms of a trans gendered visual culture or are we still caught up in the same debilitating role models How does one address the ever increasing alienation between gender studies and the younger generation of students and scholars moving into higher education What is the role of gender as interdisciplinary tool in the academic analysis of visual culture as it spans across several subjects such as science social work technology psychology medicine philosophy sociology engineering communication economics religious studies business management anthropology geography historical studies cultural and media studies visual studies art history and literature studies **Ekphrastic Medieval Visions** C. Barbetti,2011-10-27 Explores the transformative power of ekphrasis in high and late medieval dream visions and mystical visions Demonstrates that medieval ekphrases reveal ekphrasis as a process rather than a genre and shows how it works with cultural memory to transform shift and revise composition *Performing New Media, 1890-1915* Kaveh Askari,Scott Curtis, Frank Gray,Louis Pelletier,2014-05-29 Essays examining the effects of media innovations in cinema at the turn of the twentieth century affected performances on screen as well as beside it In the years before the First World War showmen entrepreneurs educators and scientists used magic lanterns and cinematographs in many contexts and many venues To employ these silent screen technologies to deliver diverse and complex programs usually demanded audio accompaniment creating a performance of both sound and image These shows might include live music song lectures narration and synchronized sound effects provided by any available party projectionist local talent accompanist or backstage crew and would often borrow techniques from shadow plays and tableaux vivants The performances were not immune to the influence of social and cultural forces such as censorship or reform movements This collection of essays considers the ways in which different visual practices carried out at the turn of the twentieth century shaped performances on and beside the screen **The Gas Engineer's Magazine** ,1902
