In addition, students read graphs and make their own interpretations of what the information yields about behavior. Each exercise begins with a short lesson and then has short assignments that range from 1 minute to 30 minutes worth of work; some are short answer, some are projects, and some are more involved. The workbook also incorporates students' exercises for SNIFFY THE VIRTUAL RAT, VERSION 2.0. field is that investigators are trained in a variety of techniques and skills This work requires knowledge of skills in such diverse techniques as surgery animal training basic electronics computer programming statistics and histology as well as having a good theoretical background knowledge of the relevant literature and the creativity and logic necessary to design and execute critical experiments One does not have to be an expert in all of these skills and conversely not all skills require an expert
