Schuyler, 2001 Some of Schuyler's tried and true tips include The single point estimate is almost always wrong so that it is always better to express judgments as ranges A probability distribution completely expresses someone's judgment about the likelihood of values within the range We often need a single value cost or other assessment and the expected value mean of the distribution is the only unbiased predictor Expected value is the probability weighted average and this statistical idea is the cornerstone of decision analysis Some decisions are easy perhaps aided by quick decision tree calculations on the back of an envelope Decision dilemmas typically involve risky outcomes many factors and the best alternatives having comparable value We only need analysis sufficient to confidently identify the best alternative As soon as you know what to do stop the analysis Be alert to ways to beneficially change project risks We can often eliminate avoid transfer or mitigate threats in some way Get to know the people who make their living helping managers sidestep risk They include insurance agents partners turnkey contractors accountants trainers and safety personnel Organizational Aspects of Health Informatics Nancy M. Lorenzi, Robert T. Riley, 1995 *Organizational Aspects of Health Informatics* teaches effective management strategies for preparing health care organizations and their people for technological change as well as strategies for managing the altered organization once the new information systems are in place *Don't Park Your Brain Outside* Francis T. Hartman, 2000 SMART projects are strategically managed aligned regenerative and transitional Hartman examines projects from a stakeholder perspective and with a manager's eye toward keeping stakeholders healthy and happy Proceedings of the Institution of Civil Engineers, 2008
