Resources in Education, 1996 **Biology** Neil A. Campbell, Jane B. Reece, 2005 Neil Campbell and Jane Reece's BIOLOGY remains unsurpassed as the most successful majors biology textbook in the world. This text has invited more than 4 million students into the study of this dynamic and essential discipline. The authors have restructured each chapter around a conceptual framework of five or six big ideas. An Overview draws students in and sets the stage for the rest of the chapter; each numbered Concept Head announces the beginning of a new concept; and Concept Check questions at the end of each chapter encourage students to assess their mastery of a given concept. New Inquiry Figures focus students on the experimental process, and new Research Method Figures illustrate important techniques in biology. Each chapter ends with a Scientific Inquiry Question that asks students to apply scientific investigation skills to the content of the chapter. Praeger Guide to the Psychology of Gender Michele A. Paludi, 2004-11-30 When we examine the field of gender psychology closely, we note that much of what the popular media tells us about women and men does not hold up to research scrutiny. This handbook helps to replace media stereotypes and myths with realities and shows us that there are more similarities between the sexes than differences. The contributors to this handbook have a highly practical and readable approach that will prompt readers to examine their self-awareness and social tolerance to biases against women and men in our social institutions such as schools and workplaces. They also reveal that the increased participation in courses and reading of literature on gender has improved gender role attitudes and behavior, causing both sexes to treat each other with more respect and dignity. The contributors to this volume focus on gender role development and multicultural issues throughout the lifecycle. They also emphasize the empowerment of both sexes. The gender-related topics in this handbook include Teacher socialization of girls and boys, Women's and men's verbal and nonverbal communication skills, Women's and men's voting patterns, Sexual violence, The gender wage gap, Women's and men's friendships and sexual relationships, Parents' communication of masculinity and femininity to their children. **Psychological Abstracts** Walter Samuel Hunter, 1929
