

## Sample Academic Writing *Part 2*

### Candidate Response 1

#### WRITING TASK 2

I completely disagree with the written statement. I believe that most of the people in the world have more information about their health and also about how they can improve their healthy conditions.

Nowadays, information about how harmful is to smoke for our bodies can be seen in many packets of cigars. This is a clear example how things can change from our recent past. There is a clear trend in the diminishing of smokers and if this continues it will have a positive impact in our health.

On the other hand, the alimentation habits are changing all over the world and this can affect people's health. However every one can choose what to eat every day. Mostly everybody, from developed societies, know the importance of having a healthy diet.

Advances such as the information showed in the menus of fast food restaurants will help people to have a clever choice before they choose what to eat.

Another important issue that I would like to mention is how medicine is changing. There are new discovers and treatments almost every week and that is an inequivoque sintom of how things are changing in order to improve the world's health.

#### Examiner comment

##### Band 5.5

A clear position is presented from the outset, supported by relevant ideas. These would require further development to achieve a higher score. The response is under-length, however. Information and ideas are generally arranged coherently and there is a clear overall progression. Cohesive devices are used effectively, but paragraphing is not always logical. A range of vocabulary is attempted, although there are some errors in spelling, word choice and word formation. There also appears to be some interference from the test taker's first language, e.g. 'alimentation', but these features do not make the answer difficult to understand. There is a mix of sentence forms, but the level of error is too high to achieve a higher band score.
