Project Zero Frameworks for Early Childhood Education: Project Spectrum : early learning activities Howard Gardner, David Henry Feldman, Mara Krechevsky, Jie-Qi Chen, 1998-11-13 The groundbreaking work of Harvard University psychologist Howard Gardner on multiple intelligences and Tufts University psychologist David Henry Feldman on nonuniversal development is fast becoming the standard by which children's intelligence and cognitive development is understood. In this landmark three-volume set, Mara Krechevsky and her colleagues at Project Zero make these insights available for both teachers and scholars alike. This curriculum resource provides enriching activities in a wide variety of disciplines including mechanics and construction, movement and music.

Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion, particularly for students with marginalized identities. This poses problems, particularly when science permeates every aspect of contemporary American life. Institutions' repeated failures to disrupt systemic oppression in STEM has led to a mostly white, cisgender, and male scientific workforce replete with implicit and/or explicit biases. Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom. Maintaining views on science as inherently objective isolates it from the world in which it is performed. STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students' social and educational capital. We must create a STEM environment in which students with marginalized identities feel respected, listened to, and valued. We must assist students in understanding how their positionality, privilege, and power both historically and currently impacts their meaning-making and understanding of STEM.
