

ELEMENTS OF A GRID

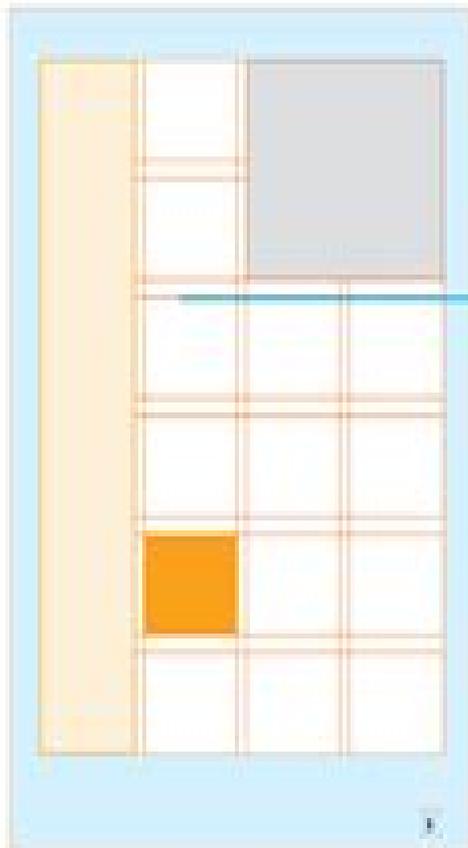

1. Know the Components

The main components of a grid are margins, columns, columns, leading, tracking, gutter lines, and baselines. Starting with a page that is four pages wide and four pages high, you can see how all of these elements work together to create a grid.

MARGINS are vertical columns that define the space between the text and the edges of the page. The width and number of margins on a page or across the entire spread are determined by the content.

MODULES are individual elements, typically, repeated across a grid. Consistent modules can create interest and ease of reading.

MARGINS are the space between the text and the edges of the page. The width and number of margins on a page or across the entire spread are determined by the content.

MARGINS are groups of columns or rows that are used to define the space between the text and the edges of the page.

BASELINES are elements that define the vertical position of the text. Baselines are used to align the text and to create a consistent reading experience.

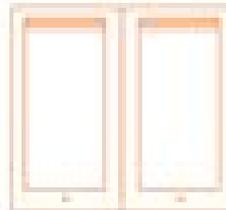

MARGINS are the space between the text and the edges of the page. The width and number of margins on a page or across the entire spread are determined by the content.

BASIC GRID DIAGRAMS

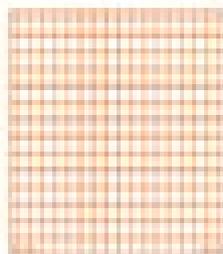

2. Learn the Basic Structures

Although the diagrams below show common structures, there are additional variations on the basic configurations. The illustrations guide the designer and help them understand how to use the grid.

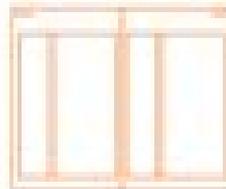

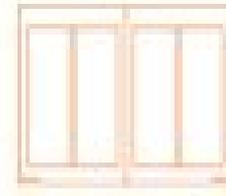

1 COLUMN GRID is a simple grid for a single column of text. It is used for a variety of applications, including books, reports, and forms. The width of the column is determined by the page width and the margins.

2 COLUMN GRID is used for a two-column layout. It is used for a variety of applications, including books, reports, and forms. The width of the columns is determined by the page width and the margins.

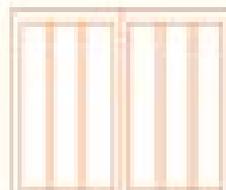

2 COLUMN GRID can be used to create a grid with two columns of text. It is used for a variety of applications, including books, reports, and forms. The width of the columns is determined by the page width and the margins.

MULTICOLUMN GRID is used for a grid with multiple columns of text. It is used for a variety of applications, including books, reports, and forms. The width of the columns is determined by the page width and the margins.

3 COLUMN GRID is used for a grid with three columns of text. It is used for a variety of applications, including books, reports, and forms. The width of the columns is determined by the page width and the margins.
