Learning From Good And Bad Data:

Learning from Good and Bad Data Philip D. Laird, 2012-12-06 This monograph is a contribution to the study of the identification problem the problem of identifying an item from a known class using positive and negative examples This problem is considered to be an important component of the process of inductive learning and as such has been studied extensively In the overview we shall explain the objectives of this work and its place in the overall fabric of learning research Context Learning occurs in many forms the only form we are treating here is inductive learning roughly characterized as the process of forming general concepts from specific examples Computer Science has found three basic approaches to this problem Select a specific learning task possibly part of a larger task and construct a computer program to solve that task Study cognitive models of learning in humans and extrapolate from them general principles to explain learning behavior Then construct machine programs to test and illustrate these models xi XII PREFACE Formulate a mathematical theory to capture key features of the induction process This work belongs to the third category The various studies of learning utilize training examples data in different ways The three principal ones are Similarity based or empirical learning in which a collection of examples is used to select an explanation from a class of possible rules [Analytics and Data Science](#) Amit V. Deokar, Ashish Gupta, Lakshmi S. Iyer, Mary C. Jones, 2017-10-05 This book explores emerging research and pedagogy in analytics and data science that have become core to many businesses as they work to derive value from data The chapters examine the role of analytics and data science to create, spread, develop and utilize analytics applications for practice Selected chapters provide a good balance between discussing research advances and pedagogical tools in key topic areas in analytics and data science in a systematic manner This book also focuses on several business applications of these emerging technologies in decision making i.e. business analytics The chapters in [Analytics and Data Science Advances in Research and Pedagogy](#) are written by leading academics and practitioners that participated at the Business Analytics Congress 2015 Applications of analytics and data science technologies in various domains are still evolving For instance the explosive growth in big data and social media analytics requires examination of the impact of these technologies and applications on business and society As organizations in various sectors formulate their IT strategies and investments it is imperative to understand how various analytics and data science approaches contribute to the improvements in organizational information processing and decision making Recent advances in computational capacities coupled by improvements in areas such as data warehousing, big data analytics, semantics, predictive and descriptive analytics, visualization and real time analytics have particularly strong implications on the growth of analytics and data science [Developments in Applied Artificial Intelligence](#) Ali Moonis, Paul Chung, Chris Hinde, 2003-08-02 The refereed proceedings of the 16th International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems IEA/AIE 2003 held in Loughborough UK in June 2003 The 81 revised full papers presented were carefully reviewed and selected from more than 140 submissions
