foreword for this interesting volume particularly as over many years I have had the privilege of interacting with the editors and a majority of the contributors in various professional roles as a colleague mentor or research collaborator The editors

begin their introduction by asking why one would want to read yet another book on human development They immediately answer their question by pointing out that many developmentally oriented texts and other treatises neglect the theoretical

foundations of human development and fail to embed psychological constructs within the multidisciplinary context so

essential to understanding development This volume provides a positive remedy to past deficiencies in volumes on human

development with a well organized structure that leads the reader from a general introduction through the basic processes to methodological issues and the relation of developmental constructs to social context and biological infrastructure This

approach does not surprise After all the editors and most of the contributors at one time or another had a connection to the Max Planck Institute of Human Development in Berlin whether as students junior scientists or senior visitors That institute
