Data Structures and Algorithms in Java Adam Drozdek,2012-11-30 Data structures serve as a foundation upon which many other computer science fields are built Thus some knowledge of data structures is a prerequisite for students who wish to work in the design implementation testing or maintenance of virtually any software systems The Java language an object oriented descendant of C and C has gained popularity in industry and academia as an excellent programming language due to widespread use of the Internet Thus the use of Java to teach a data and algorithms course is well justified Data
