CHAPTER 1

UNDERSTANDING HABITS

Introduction

What are habits? Habits are actions that you repeat regularly, often without thinking about them. They can be good or bad, and they can have a significant impact on your life. Understanding habits is the first step to changing them.

Why do we have habits? Habits are formed through a process called habit formation. This process involves repeating an action until it becomes automatic. The brain then creates a neural pathway that makes the action easier to perform.

How can I change my habits? To change a habit, you need to understand the triggers that lead to the habit. You can then replace the old habit with a new one. This process is often referred to as the habit loop.
