Operations Excellence Program Operations Mckinsey:

Navigating the Data Minefields Scott M. Shemwell, 2025-06-13 Volumes have been written on the need for high quality data to support organizational decision making Most of those books appear to focus on the development and sustainment of data from the standpoint of those directly responsible for the management of data stores and the use of technology necessary to acquire store and secure data sets Navigating the Data Minefields Management s Guide to Better Decision Making provides executives and subject matter experts SMEs with a reasonable set of useful tools they can adapt to their specific organization and operating environment While complexity can never be taken out of an integrated system decision making can be facilitated by using metrics that take into consideration the quality of the data used to make decisions i e risk mitigation Professionals who depend on large high quality data sets such as senior and mid level management engineering SMEs data scientists IT systems engineers and medical professionals will want to have this book in their decision making arsenal

Health Systems Science E-Book Susan E. Skochelak, 2020-05-06 The first textbook devoted to this emerging area Health Systems Science now brings you fully up to date with today s key issues and solutions This increasingly important branch of health care explores how health care is delivered how health care professionals work together to deliver that care and how the health system can improve patient care and health care delivery Along with basic and clinical sciences health systems science is rapidly becoming a crucial third pillar of medical science with an emphasis on understanding the role of human factors systems engineering leadership and patient improvement strategies that will help transform the future of health care and ensure greater patient safety In this 2nd Edition new chapters new exercises and new information help you acquire the knowledge and skills you need for success in today s challenging healthcare system The first comprehensive text for mastering health systems science offering practical coverage of all of the factors in the lives of patients that influence their well being the structures and processes of the health system itself societal factors communication and information technology NEW to this edition New content on systems thinking ethics and legal issues and international care models further define and address this new important component of health care education additional exercises and expanded information on the patient experience and private practice Complete coverage of patient safety quality improvement value in health care teamwork stewardship of health care resources population health clinical informatics care coordination leadership and health care financing reform Patient improvement strategies incorporate checklists information technology team training and more A consistent chapter template provides clear coverage of each topic including Learning Objectives Chapter Outline Core Chapter Content Summary Questions for Reflection and Annotated Bibliography and References Developed by the American Medical Association s Accelerating Change in Medical Education Consortium and authored by a team that includes AMA staff members working with individuals from the Consortium member schools Water, Politics and Money Manuel Schiffler, 2015-05-11 This book reveals all that can potentially happen when a private company takes over a

local water supply system both the good and the bad Backed by real life stories of water privatization in action author Manuel Schiffler presents a nuanced picture free of spin or fear mongering Inside readers will find a detailed analysis of the multiple forms of water privatization from the outright sale of companies to various forms of public private partnerships After covering their respective strengths and weaknesses it then compares them to purely publicly managed water utilities The book examines the privatization and the public management of water and sewer utilities in twelve countries the United States the United Kingdom France Germany the Philippines Cambodia Egypt Jordan Uganda Bolivia Argentina and Cuba Readers will come to understand how and why some utilities failed while others succeeded including some that substantially increased access became more efficient and improved service quality even in the poorest countries of the world It is natural that a private company taking over a local water supply system causes both fear and worry for consumers With the aid of solid empirical evidence this book argues that who manages the system is only half the story Rather it is the corporate culture of the utilities and the political culture of where they operate that more often than not determines performance and how well a community is served

TRUST Haroon Abbu, Paul Mugge, Gerhard Gudergan, 2021-01-28 Trust The Winning Formula for Digital Leaders is intended to help you become a more successful digital leader and maybe a better person more about this at the end We know you are thinking I am not the CEO or even the Chief Digital Officer I just work in the ranks of my organization so how can this book help me Due to a set of existential threats like the global pandemic all businesses are frantically trying to remake themselves into being digital businesses Digital transformation is taking the world by storm and everyone in the organization is or will be touched by it We first studied the phenomenon of digital transformation through an extensive survey of global organizations Called the Patterns of Digitization the survey examined every aspect of how digital transformation is implemented We looked at over 500 companies business strategies resource allocation design practices and looked at their softer side like how the leaders actually communicate with employees What we learned from this is that no matter what type and size company you are you fall into two different camps Organizations are either Digitally Developing the far majority or they are Digitally Mature Through this analysis we learned something else very important Digitally Mature organizations are managed differently Their leaders align human financial resources with the strategy create a collaborative and nimble development environment promote open transparent communication and initiate other important activities At the 2020 IEEE International Conference on Engineering Technology and Innovation we presented Digital Leadership Character and Competency differentiates Digitally Mature Organizations Leaders Through it we show how the character and competency of these leaders the foundations of trust help set them and their organizations apart Our intention was not to laud Digitally Mature leaders as it was to help lagging companies grasp what is truly involved in implementing a digital transformation and what they need to do to catch up This has been our modus operandi from the beginning But just exhorting digital leaders to show more character and demonstrate their competency with digital technologies is still not

enough To really help them read you we needed to go deeper The jewel of this book is its in depth interviews with proven successful digital leaders And we didn t stop with just exploring their character and competency we asked them how specifically they build trust through their intentions integrity capabilities and results Of course these are the four core values of Stephen M R Covey s Speed of Trust framework and the basis of the book s 20 question Interview Guide Now enjoy the book and see for yourselves how these leaders rely on these very humancentric actions along with the trust and respect of their people to lead very aggressive and very complex digital transformations From the Inside Flap Endorsed by Stephen M R Covey The New York Times and 1 Wall Street Journal bestselling author of The Speed of Trust The One Thing that Changes Everything Foreword by Gerald C Kane Author of The Technology Fallacy How People are The Real Key to Digital Transformation Digital Leaders Included in the Book Authors take a deep dive into the actions of successful digital leaders They built an extensive interview guide based on Stephen M R Covey s now famous Speed of Trust model and conducted 1 1 interviews with the following global digital leaders Chuck Sykes CEO Sykes Enterprises Andera Gadeib CEO Dialego Larry Blue CEO Bell Howell Robert Kallenberg Director of Strategy and Organization Porsche AG Brandon Batten Owner Operator Flying Farmer LLC Marc Schlichtner Principal Key Expert Product Portfolio Innovation Management Siemens Healthineers Seth Kaufman President CEO Mo t Hennessy North America Deborah Leff former Global Leader and Industry CTO of Data Science and AI IBM Krishna Cheriath VP Head of Digital Data and Analytics Zoetis Inc Dominik Schlicht CEO Talbot New Energy AG Craig Melrose Executive Vice President Digital Transformation Solutions PTC Dagmar Wirtz CEO 3WIN and Rahul C Basole Managing Director and Global Lead for Visual Data Science Accenture AI Visit patternsofdigitization.com From the Back Cover The passion of these authors and their commitment to meaningful research is abundant in this compelling read They have studied what separates digitally mature companies from the many companies that lag behind and conclude that the ability of their leaders to personally develop and enable trusting relationships is indeed the difference maker Using the Speed of Trust framework as a guide the authors conducted direct interviews with digital leaders and show how their integrity intent capabilities and results significantly impact performance across a broad range of transformation goals The insights and lessons learned from these interviews will be invaluable to digital leaders The pace of change in the digital world makes it easy to get caught up in the moving target of technology details e g cloud computing artificial intelligence etc and lose sight of the ever more important human centric dimension of building trust Stephen M R Covey The New York Times and 1 Wall Street Journal bestselling author of The Speed of Trust The One Thing that Changes Everything The book is about and for digital leaders the people in charge of changing the course of their organizations Authors bring it all together with interview chapters from thirteen digital leaders on how they build trust Excerpt from the foreword to this book by Gerald Kane This book is a gem The winning formula developed using interviews with digital leaders from a multitude of industries provides a practical guide to transform any company into a mature digital businesses Robert

Kallenberg Head of Strategy Porsche AG The authors have articulated the leadership challenge of the digital era The ability to digitally transform businesses by cultivating trust This is a must read for all aspiring digital leaders Chuck Sykes CEO Sykes International Trust is the critical difference maker in impactful leadership The authors have clearly identified and elevated this philosophy It s a great read not only for all business leaders but for every employee in your organization Seth Kaufman CEO Mo t Hennessy North America

Globalisation and Education Bob Lingard,2020-10-28 This collection focuses on education policy in the context of globalisation and draws together influential research dealing with the interplay between education policy and globalisation Globalisation and neo liberalism in relation to education policy are addressed as is the impact of the global financial crisis the recent rise of ethno nationalism and progressive challenges to neo liberal hegemony A number of chapters deal with the new spatialities instantiated by globalisation s new technology and consider the implications for education policy Also discussed are global policy actors such as the OECD EU and edu businesses in education policy the significance of international large scale assessments to an emergent global policy field refugees and education English language policy and globalisation off shore schools and the importance of affect in policy in the context of globalisation The collection closes with two methodological contributions that consider the implications of globalisation in today s critical education policy analysis The collection is brought together in a substantial introduction that traverses the literature and research on globalisation and education policy and also situates the chapters and approaches in the collection within the field The chapters in this book were originally published as articles in various Taylor and Francis journals

Transform Behaviors, Transform Results! Morgan Jones,Drew Butler,Gerhard Plenert,2022-10-24 When trying to embed changes or new mindsets and behaviors organizations tend to focus on following a particular methodology rather than clearly defining the underlying behaviors that will deliver the sustainable behavioral change and align the thought processes that drive the behaviors whether their intent is to continuously improve safety or overall risk management or achieve a sustainable growth and improvement trajectory The key role of leadership teams is not to deliver results It is to inspire and own the organizational culture that delivers the expected results If culture is owned by HR it is doomed to be another thing leaders have to do on top of their day job Business leadership teams must oversee defining and managing organizational culture and have HR coach the capability of leaders to cast the right leadership shadow by role modeling the right behaviors rewarding the right behaviors in their teams and providing clarity on expectations around behaviors for all leaders and employees The most challenging part of any performance improvement implementation is the identification of key behavioral indicators KBIs The purpose of this book is to assist with that challenge and make behaviors easier to understand and identify The book defines and describes the importance of focusing on the behaviors necessary for sustainable change rather than focusing on the tools and methodology behind change management It discusses multiple lenses of change including Lean Six Sigma Agile Risk and Customer Experience and also addresses the weaknesses of complying solely with the

methodology and tools It proposes a behavioral framework to suit each particular lens This book begins with reasons most continuous improvement programs fail to deliver the expected results More importantly it discusses embedding the newly described mindsets and capabilities into the business The book concludes by providing leaders a roadmap and a coaching framework for how to align and embed their new behavioral framework at all levels starting from the front line worker up to the CEO Essentially this book leads the reader through the process of understanding the concept of defining behaviors and the difference between them and tools methodology It introduces KBIs for leaders to define and drive the desired behaviors at all levels This will increase the probability of sustainability for the improvement initiative by focusing on and maturing the behaviors these initiatives are trying to drive

Organizational Histories of Nonprofit Human Service Organizations Michael J. Austin,2013-09-13 This book is based on an important but complicated question How have nonprofit human service organizations sustained themselves over time It documents the organizational histories of pioneering nonprofits that have unique missions and significant longevity in one case 157 years This volume provides one of the few documented histories of nonprofit human service organizations and includes a cross case analysis of the major themes that help to expand our understanding of organizational lifecycles with respect to organizational growth and resilience The major themes appear in the form of clusters of organizations that are exemplars of leadership experiences of either founding or long term executive directors internal operations capacity to respond to changing community needs and external relations capacity to develop unique and or sustained relationships with funding sources and or donor populations These cases also provide students of nonprofit management with opportunities for case based learning that complements the more time limited and episodic teaching cases which rarely provide learners with a longitudinal perspective of nonprofit organizations This book was originally published as a special issue of the Journal of Evidence Based Social Work *Masters Abstracts International* ,1986
