Hemostasis and Thrombosis Emmanuel J. Favaloro, Robert C. Gosselin, 2023-05-19 This second edition volume expands on the previous edition with updates about the latest state of the art techniques used in leading hemostasis and thrombosis laboratories for diagnosis and exclusion of hemorrhagic and thrombotic diseases The chapters in this book are organized into seven parts Part One provides a general overview on hemostasis and thrombosis preanalytical issues in testing and routine hemostasis assays Part Two covers laboratory testing for thrombophilia including reviews for activated protein C resistance protein C lupus anticoagulant testing and antiphospholipid antibodies Part Three addresses monitoring continuous anticoagulant infusions and measuring the effects of oral anti thrombotic therapy Part Four talks about heparin induced thrombocytopenia and vaccine induced immune thrombotic thrombocytopenia Part Five and Six cover ADAMTS13 activity testing and new information on bleeding disorders such as chromogenic factor VIII assays measurement of emicizumab and treatment of hemophilia A and B Finally Part Seven discusses global assays research applications and postanalytical considerations Written in the highly successful Methods in Molecular Biology series format chapters include introductions to their respective topics lists of the necessary materials and reagents step by step readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls Cutting edge and comprehensive Hemostasis and Thrombosis Methods and Protocols Second Edition is a valuable resource for scientists and researchers struggling to identify the appropriate methods for hemostasis and thrombosis testing or who seek additional expert guidance on such testing

Colorist Palette Reference Book Ligia Ortega, 2017-08-30 This book has 48 pages with room for swatches and notes about your favorite color combinations and coloring techniques See back cover to see the 12 different designs in the book Try out new palettes and keep track of your favorite color combinations This book is the perfect colorist companion allowing you to keep track of your media and palettes in one place putting an end to keeping different bits of paper with color combinations and notes Includes 48 pages with a sample image to try your colors on and room for swatches and notes on colors and blending With 12 illustrations in a variety of styles Perfect for testing new media Great place to keep record of what pencils pens markers were used to color a particular page for future reference or if you need to put away your supplies before you finish coloring a page Perfect for practicing new techniques before trying on a coloring book Printed full size 8 5x11 single sided on bright white 60 lb paper to allow the use of markers tuck a couple pages or cardstock behind the page you are working on to prevent marker bleed through to other pages If you have ever hesitated to add a new color to a page you ve been working on in fear that it won t work with the ones you are using or if you love trying out new color combinations this book is for you Small scale drawings to test out your colors to see if they go together or to help you keep a record of your favorite palettes blending or coloring techniques Try out new media blending or other coloring tools or techniques before you apply them to your coloring page Perfect for blending and new techniques practice before you apply it to your coloring pages

Enzyme-Mediated Immunoassay H.M. Lenhoff, That T. Ngo, 2012-12-06 T T Ngo and H M Lenhoff Department of Developmental and Cell Biology University of California Irvine CA 92717 In 1959 Yalow and Berson used insulin labeled with radioactive iodine to develop a quantitative immunological method for determining the amount of insulin in human plasma Their method depends upon competition between insulin labeled with radioactive iodine I¹²⁵ and unlabeled insulin from plasma for a fixed and limited number of specific binding sites on the antibody to insulin The amount of the labeled insulin bound to the antibody is inversely proportional to the amount of insulin in the plasma sample Their method which is so elegantly simple in concept is made possible by the ability to detect with ease extremely low levels of radioactivity and by the exquisite specificity of an antibody capable of specifically binding the analyte Such a combination of sensitivity and specificity is the basis of this versatile analytical tool called radioimmunoassay RIA Twelve years later Engvall and Perlmann 1971 and Van Weemen and Schuurs 1971 independently introduced the use of enzymes as another category of sensitive and even more versatile labels for use in immunoassays Engvall and Perlmann 1971 coined the term ELISA which stands for Enzyme Linked Immunosorbent Assay

The Roots of Visual Awareness C.A. Heywood, A.D. Milner, C. Blakemore, 2003-10-31 The present volume was assembled in honor of Professor Alan Cowey FRS and attempts to embrace his wide range of research interests in visual neuroscience It is divided into four sections The first contains a group of papers dealing with different fundamental aspects of the visual system including the control and monitoring of eye movements The second is concerned with the functional organization of cortical visual areas and their role in visual perception and visually guided action The third addresses issues concerning color and motion perception along with broader questions of visual attention and the effects of selective brain damage on these different aspects of visual experience The fourth and final section of the volume deals explicitly with questions relating to visual awareness with particular emphasis on blindsight a topic on which Alan Cowey has worked extensively in recent years both in humans and in monkeys
