Systems Engineering In Wireless Communications:

Systems Engineering in Wireless Communications Heikki Niilo Koivo, Mohammed Elmusrati, 2009-11-04 This book provides the reader with a complete coverage of radio resource management for 3G wireless communications. Systems Engineering in Wireless Communications focuses on the area of radio resource management in third generation wireless communication systems from a systems engineering perspective. The authors provide an introduction into cellular radio systems as well as a review of radio resource management issues. Additionally, a detailed discussion of power control, handover, admission control, smart antennas, joint optimization of different radio resources, and cognitive radio networks is offered. This book differs from books currently available with its emphasis on the dynamical issues arising from mobile nodes in the network. Well known control techniques such as least squares estimation, PID control, Kalman filters, adaptive control, and fuzzy logic are used throughout the book.

Key Features: Covers radio resource management of third generation wireless communication systems at a systems level. First book to address wireless communications issues using systems engineering methods. Offers the latest research activity in the field of wireless communications extending to the control engineering community. Includes an accompanying website containing MATLAB™, SIMULINK™ exercises. Provides illustrations of wireless networks. This book will be a valuable reference for graduate and postgraduate students studying wireless communications and control engineering courses and R D engineers.

Wireless Personal Communications William H. Tranter, Brian D. Woerner, Theodore S. Rappaport, Jeffrey H. Reed, 2006-04-18 The papers appearing in this book were originally presented at the 9th Virginia Tech MPRG Symposium on Wireless Personal Communications. The Symposium on Wireless Communications, which is an annual event for Virginia Tech, was held on June 2-4, 1999. The 1999 symposium was co-sponsored by MPRG, the Division of Continuing Education, University International Programs, and the MPRG Industrial Affiliate Sponsors. Much of the success of our annual symposium, as well as the success of MPRG's research program, is due to the support of our industrial affiliates. Their support allows us to serve the wireless community through research, education, and outreach programs. At the time of the 1999 symposium, the MPRG affiliates program included the following organizations: Army Research Office, AT T Corporation, Bellsouth Cellular Corporation, Comcast Cellular Communications Inc, Datum Inc, Ericsson Inc, Grayson Wireless, Hewlett Packard Company, Honeywell Inc, Hughes Electronics Corporation, ITT Industries, Lucent Technologies, Motorola, National Semiconductor, Nokia, Nortel Networks, Qualcomm Inc, Radix Technologies Inc, Salient 3 Communications, Samsung, Advanced Institute of Technology, Southwestern Bell, Tantivy Communications, Tektronix Inc, Telcordia Technologies, Texas Instruments, TRW Inc, and the Watkins Johnson Company. As can be seen from the Table of Contents, the papers included in this book are divided into six sections. The first five of these correspond to symposium sessions and cover the following topics: Propagation and Channel Modeling (4 papers), Antennas (6 papers), Multiuser Detection (3 papers), Radio Systems and Technology (4 papers), and Wireless Data (3 papers).
