Critical Visualization Peter A. Hall, Patricio Dávila, 2022-12-01 Information may be beautiful but our decisions about the data we choose to represent and how we represent it are never neutral This insightful history traces how data visualization accompanied modern technologies of war colonialism and the management of social issues of poverty health and crime The discussion is based around examples of visualization from the ancient Andean information technology of the quipu to contemporary projects that show the fate of our rubbish and take a participatory approach to visualizing cities This analysis

places visualization in its theoretical and cultural contexts and provides a critical framework for understanding the history of information design with new directions for contemporary practice Data Visualization in Society Martin

Engelbrecht, Helen Kennedy, 2025-10-01 Today we are witnessing an increased use of data visualization in society Across domains such as work education and the news various forms of graphs charts and maps are used to explain convince and tell stories In an era in which more and more data are produced and circulated digitally and digital tools make visualization production increasingly accessible it is important to study the conditions under which such visual texts are generated disseminated and thought to be of societal benefit This book is a contribution to the multi disciplined and multi faceted conversation concerning the forms uses and roles of data visualization in society Do data visualizations do good or bad Do they promote understanding and engagement or do they do ideological work privileging certain views of the world over others The contributions in the book engage with these core questions from a range of disciplinary perspectives *Design*

for Information Isabel Meirelles, 2013-10-01 The visualization process doesn't happen in a vacuum it is grounded in principles and methodologies of design cognition perception and human computer interaction that are combined to one's personal knowledge and creative experiences Design for Information critically examines other design solutions current and historic helping you gain a larger understanding of how to solve specific problems This book is designed to help you foster the development of a repertoire of existing methods and concepts to help you overcome design problems Learn the ins and outs of data visualization with this informative book that provides you with a series of current visualization case studies The visualizations discussed are analyzed for their design principles and methods giving you valuable critical and analytical tools to further develop your design process The case study format of this book is perfect for discussing the histories theories and best practices in the field through real world effective visualizations The selection represents a fraction of effective visualizations that we encounter in this burgeoning field allowing you the opportunity to extend your study to other solutions in your specific field's of practice This book is also helpful to students in other disciplines who are involved with visualizing information such as those in the digital humanities and most of the sciences **More Technology for the Rest of Us**

Nancy D. Courtney, 2010-02-26 In this valuable book 11 chapters each overview a technology of interest to librarians working in the field today From cloud computing to data curation to open source software the world of technology offers great opportunity and potential frustration Nancy Courtney and her team of IT experts have set out to enhance the former and alleviate the latter More Technology for the Rest of Us A Second Primer on Computing for the Non IT Librarian follows up on Courtney's 2005 technology volume by tackling the most recent advances in IT Each chapter describes a technology important to the library field explains how it works in terms a non IT professional can understand and describes its uses The essays in More Technology for the Rest of Us are not meant to make readers experts but to provide a basic introduction to some of the current technologies impacting libraries and their patrons Articles are brief and clearly written and computer
