Trestrail, III, 2007-10-28 In this revised and expanded edition of his critically acclaimed *Criminal Poisoning Investigational Guide for Law Enforcement Toxicologists, Forensic Scientists, and Attorneys*, leading forensic scientist John Trestrail offers a pioneering survey of all that is known about the use of poison as a weapon in murder. Topics range from the use of poisons in history and literature to convicting the poisoner in court and include a review of the different types of poisons, techniques for crime scene investigation, and the critical essentials of the forensic autopsy. The author updates what is currently known about poisoners in general, psychological profile types, and statistical analyses, and their victims who get poisoned, investigative considerations, and classic symptoms of poisoning. The Appendix has been updated to include the more commonly used poisons as well as the use of antifreeze as a poison to reflect some cases that have recently come to light **Information Resources in Toxicology, Volume 1: Background, Resources, and Tools**, 2020-05-16 This new fifth edition of *Information Resources in Toxicology* offers a consolidated entry portal for the study, research, and practice of toxicology.
