*The Evolution of Economic Diversity* Antonio Nicita,Ugo Pagano,2013-12-16 The traditional role of evolutionary theory in the social sciences has been to explain the existence of an object in terms of the survival of the fittest In economics this approach has acted as a justification for hypotheses such as profit maximisation or the existence of institutions in terms of their overall efficiency This volume challenges that view and argues that one of the first tasks of economic theory should be to explain the enormous diversity of institutional arrangements that has characterised human societies

**Economic Analysis of Contract Law** Sugata Bag,2018-01-24 This book examines the main issues arising in economic analysis of contract law with special attention given to the incomplete contracts It discusses both the main features of contract law as they relate to the problem of economic exchange and how the relevant legal rules and the institutions can be analysed from an economic perspective Evaluate the welfare impacts analyses the effects and the desirability of different breach remedies and examines the optimal incentive structure of party designed

liquidated damages under the different dimensions of informational asymmetry Overall the book aims to contribute to the legal debate over the adoption of the specific breach remedies when the breach victim's expectation interest is difficult to assess and to the debate over courts' reluctance to implement large penalties in the event of breach of contracts *The Canadian Journal of Economics*, 1999 A general interest journal in economics *Ownership and Business Value in Information Technologies* Kunsoo Han, 2006 *African Journal of Modern Society*, 2011 **Republic of Belarus, Recent Economic Developments**, 1999 *Global Sourcing* Pol Antràs, Elhanan Helpman, 2004 We present a North-South model of international trade in which differentiated products are developed in the North. Sectors are populated by final good producers who differ in productivity levels. Based on productivity and sectoral characteristics, firms decide whether to integrate into the production of intermediate inputs or outsource them. In either case, they have to decide from which country to source the inputs. Final good producers and their suppliers must make relationship-specific investments both in an integrated firm and in an arm's length relationship. We describe an equilibrium in which firms with different productivity levels choose different ownership structures and supplier locations, i.e. they choose different organizational forms. We then study the effects of within-sectoral heterogeneity and variations in industry characteristics on the relative prevalence of these organizational forms. The analysis sheds light on the structure of foreign trade within and across industries. NBER website **Journal of Institutional and Theoretical Economics**, 1991 *Economic Sciences in the Netherlands*, 1989 *Journal of Economic Literature*, 2006 *Offshoring in a Knowledge Economy* Pol Antràs, Luis Garicano, Esteban Rossi-Hansberg, 2005 How does the formation of cross-country teams affect the organization of work and the structure of wages? To study this question, we propose a theory of the assignment of heterogeneous agents into hierarchical teams where less skilled agents specialize in production and more skilled agents specialize in problem solving. We first analyze the properties of the competitive equilibrium of the model in a closed economy and show that the model has a unique and efficient solution. We then study the equilibrium of a two-country model (North and South) where countries differ in their distributions of ability and in which agents in different countries can join together in teams. We refer to this type of integration as globalization. Globalization leads to better matches for all southern workers but only for the best northern workers. As a result, we show that globalization increases wage inequality in the South but not necessarily in the North. We also study how globalization affects the size distribution of firms and the patterns of consumption and trade in the global economy. National Bureau of Economic Research web site
