Chawdhry,Rajkumar Roy,Raj K. Pant,2012-12-06 Soft Computing has emerged as an important approach towards achieving intelligent computational paradigms where key elements are learning from experience in the presence of uncertainties fuzzy belief functioos and evolutioo of the computing strategies of the learning agent itself Fuzzy neural and evolutionary computing are the three major themes of soft computing The book presents original research papers dealing with the theory of soft computing and its applicatioos in engineering design and manufacturing The methodologies have been applied to a large variety of real life problems Applicatioo of soft computing has provided the opportunity to integrate human like vagueness and real life uncertainty to an otherwise hard

computer programme Now a computer programme can learn adapt and evolve using soft computing The book identifies the strengths and limitations of soft computing techniques particularly with reference to their engineering applications The applications range from design optimisation to scheduling and image analysis Goal optimisation with incomplete information and under uncertainty is the key to solving real life problems in design and manufacturing Soft computing techniques presented in this book address these issues Computational complexity and efficient implementation of these techniques are also major concerns for realising useful industrial applications of soft computing The different parts in the book also address these issues The book contains 9 parts 8 of which are based on 00 papers from the 2nd On line World Conference on Soft Computing in Engineering Design and Manufacture WSC2
