Service Management Implementation Using ODOO/OPENERP. Muhammad Anas Alghamian,Luca Vettori,2017 The goal of this Master Thesis project is to improve the process maturity using CMMI and ITIL best practices in two specific business processes like Marketing Expansion and Sales Order for NFV services AS IS The two above processes were implemented using an open source Enterprise Resource Planning ERP called Odoo OpenERP This powerful tool is a suite of enterprise management applications that offers several modules to use in our case are sales and product modules And that gave us the possibility to offer specific ICT services and designing our NFV service catalog Once we finished to implement both business processes in Odoo we take profit of ITIL for the service management adaptation to increase maturity level ITIL was very useful in this case because it is a powerful best practice for service management lifecycle After reviewing all ITIL

books and studying them we found a valuable information in Service Strategy Service Design and Service Operation Phases that characterize ITIL itself for process analysis In this way finally we could design the adopted processes and services TOBE in Odoo system in Sales Module with the intention of increasing the process maturity level CMMI Level 3 using CMMI best practice   **Advanced PHP and OpenERP / Odoo 7 Interfacing** Akhmad Daniel Sembiring, Versi PDF atau Pembayaran Lewat Paypal BCA Mandiri disini http shop vitraining co OpenERP Odoo provides an application programming interface using it s XML RPC webservices The service is ready to be accessed by any programming language that is capable on communication through XML RPC interface This book explain in details on how to setup configure and do the integration of external system into OpenERP Odoo Started with the OpenERP installation steps both for Linux and Windows then PHP XAMPP installation for both operating systems and the required preparation steps to take in order that the systems are ready to be integrated together Taking PHP as the interfacing scripting languange using it s XML RPC library this book explains how to create a PHP class that contains methods for login search read create delete and update data stored on OpenERP Then how to use that class for real life example on accessing a legacy MySQL database and importing the data into OpenERP and managing the status of already imported data PHP provides a wide variety of object oriented frameworks so this book also explain on how to use the class from inside a PHP framework taking Yii Framework as an example At the end of the topics it s explained on how to automate the integration process periodically In Linux we utilize the cron job and in Windows we use the Task Scheduler The book is live downloadable and purchasable from Google Play store but you can also purchase it directly from http vitraining com shop where payment can be made in local Indonesian bank About the writer http vitraining com akhmad daniel sembiring Table of Contents Case Study and Objectives Backgrounds Objectives Architecture and Design The Database Structure The Scripting Languange OpenERP Installation on Ubuntu Linux PostgreSQL Installation Install the Python Modules Download the Source Code Extract the Source Code Configure and Run the Server Configure OpenERP to Run as a Service Apache MySQL and PHP Installation on Linux Installing Apache Installing MySQL Installing PHP PHP Modules See PHP on the Server OpenERP Installation on Windows Download the Latest Installer Run the Installer XAMPP Installation for Windows Download XAMPP Installation Testing and Securing XAMPP Preparations Create a Development Database Activate PHP Curl Module Testing the Curl Module Installation of XML RPC Library Download the XML RPC Library Extract the xmlrpc 2 2 tar gz File Project Folder Setup The MyOpenERPLib Class Login Search Read Create Delete Write Create and Add New Records of one2many Fields Write and Add More Records of one2many Fields Write and Change Data on the one2many Fields Summary Processing Sales Order Data Create a MySQL Development Database Common Database Connection Importing Partners Importing Products Importing Sale Order and Order Lines Executing Actions on the Server The exec Method The searchAny Method Create the Order Confirm Script Integrating With Yii Framework Automating the Process The Wrapper Script Setup on Linux Installing wget Cron Job Setup Setup on Windows

Installing wget Task Scheduler Setup Conclusion References **Odoo 14 Development Cookbook** Parth Gajjar,Alexandre Fayolle,Holger Brunn,Daniel Reis,2020-12-24 With over 200 recipes covering real world examples take your Odoo development skills to the next level and solve complex business problems using this guide Key Features Book DescriptionWith its latest iteration the powerful Odoo framework released a wide variety of features for rapid application development This updated Odoo development cookbook will help you explore the new features in Odoo 14 and learn how to use them to develop Odoo applications from scratch You ll learn about the new website concepts in Odoo 14 and get a glimpse of Odoo s new web client framework the Odoo Web Library OWL Once you ve completed the installation you ll begin to explore the Odoo framework with real world examples You ll then create a new Odoo module from the ground up and progress to advanced framework concepts You ll also learn how to modify existing applications including Point of Sale POS applications This book isn t just limited to backend development you ll discover advanced JavaScript recipes for creating new views and widgets As you progress you ll learn about website development and become a quality Odoo developer by studying performance optimization debugging and automated testing Finally you ll delve into advanced concepts such as multi website In App Purchasing IAP Odoo sh the IoT Box and security By the end of the book you ll have all the knowledge you need to build impressive Odoo applications and you ll be well versed in development best practices that will come in handy when working with the Odoo framework What you will learn Build beautiful websites with Odoo CMS using dynamic building blocks Get to grips with advanced concepts such as caching prefetching debugging Modify backend JavaScript components and POS applications with the new OWL framework Connect and access any object in Odoo via Remote Procedure Calls RPC Manage deploy and test an Odoo instance with Odoo sh Configure IoT Box to add and upgrade Point of Sale POS hardware Find out how to implement in app purchase services Who this book is for <u>Odoo 12 Development Essentials</u> Daniel Reis,2018-12-28 Extend your skills with Odoo 12 to build resourceful and open source business applications Key FeaturesExplore Odoo 12 capabilities to develop business applicationsProgram business logic and manipulate data to implement specific business rules in your applicationsIntegrate Python APIs for building customizable and scalable business logicBook Description Odoo is one of the best platforms for open source ERP and CRM Its latest version Odoo 12 brings with it new features and updates in Python packages to develop more customizable applications with additional cloud capabilities The book begins by covering the development essentials for building business applications You will start your journey by learning how to install and configure Odoo and then transition from having no specific knowledge of Odoo to being ready for application development You will develop your first Odoo application and understand topics such as models and views Odoo 12 Development Essentials will also guide you in using server APIs to add business logic helping you lay a solid foundation for advanced topics As you progress through the chapters you will be equipped to build and customize your applications and explore the new features in Odoo 12 such as cloud integration to scale your business applications You will get insights into
