Jimerson,Susan

M. Swearer, Dorothy L. Espelage, 2009-12-04 *The Handbook of Bullying in Schools* provides a comprehensive review and analysis of what is known about the worldwide bullying phenomena. It is the first volume to systematically review and integrate what is known about how cultural and regional issues affect bullying behaviour and its prevention. Key features include the following: Comprehensive forty one chapters bring together conceptual, methodological and preventive findings from this loosely coupled field of study thereby providing a long needed centerpiece around which the field can continue to grow in an organized and interdisciplinary manner. International Focus approximately forty percent of the chapters deal with bullying assessment, prevention and intervention efforts outside the USA. Chapter Structure to provide continuity chapter authors follow a common chapter structure: overview, conceptual foundations, specific issues or programs and a review of current research and future research needs. Implications for Practice a critical component of each chapter is a summary table outlining practical applications of the foregoing research. Expertise the editors and contributors include leading researchers, teachers and authors in the bullying field, most of whom are deeply connected to organizations studying bullying around the world. **Grade Aid Workbook with Practice Tests** Denise Ann Bodman, Carol Lynn Martin, Richard Fabes, 2005-07-18

Preventing and Treating Bullying and Victimization Eric Vernberg, Bridget Biggs, 2010-03-25 Research evidence on bully/victim problems has accumulated rapidly in recent years. From this there is little doubt that prolonged involvement in bullying as a perpetrator, victim or not uncommonly as both a perpetrator and target of bullying conveys risk for many aspects of development. As in many emerging areas of psychological science, diverse research efforts evolved more or less independently producing a very large and rich body of knowledge but making it difficult to gain a comprehensive, integrated view of the overall evidence base. *Preventing and Treating Bullying and Victimization* looks across the sometimes disparate perspectives from school, clinical and developmental researchers and professionals with an eye towards describing and integrating current knowledge into a guide for evidence based practices and further research. The authors offer new directions for understanding this complex problem and for enhancing intervention approaches. This edited book is comprised of three sections: Theoretical Perspectives, Assessment and Intervention, and Recommendations for Policy, Practice and Research. It is of interest to a number of professions and disciplines including clinical, developmental, counseling and school psychologists, social workers, school administrators and educators and public officials involved in setting policies.
