chapters apply the concepts defined earlier for Gaussian models to models for binary responses e.g. logit and probit ordinal responses e.g. ordered logit and ordered probit and count responses e.g. Poisson Models with multiple levels of random variation are then considered as well as models with crossed nonnested random effects The most complete and up to date depiction of Stata's capacity for fitting generalized linear mixed models Multilevel and Longitudinal Modeling Using Stata serves as an ideal introduction for Stata users wishing to learn about this powerful data analysis tool
