**C how to Program** Paul J. Deitel,Harvey M. Deitel,2015-12-21 For courses in computer programming This package contains MyProgrammingLab C How to Program is a comprehensive introduction to programming in C Like other texts of the Deitels How to Program series the book serves as a detailed beginner source of information for college students looking to embark on a career in coding or instructors and software development professionals seeking to learn how to program with C The Eighth Edition continues the tradition of the signature Deitel Live Code approach presenting concepts in the context of full working programs rather than incomplete snips of code This gives students a chance to run each program as they study it and see how their learning applies to real world programming scenarios Personalize Learning with MyProgrammingLab This package includes MyProgrammingLab an online homework tutorial and assessment program designed to work with this text to engage students and improve results Within its structured environment students practice what they learn test their understanding and pursue a personalized

study plan that helps them better absorb course material and understand difficult concepts MyProgrammingLab should only be purchased when required by an instructor Please be sure you have the correct ISBN and Course ID Instructors contact your Pearson representative for more information

**Data Clustering in C++** Guojun Gan, 2011-03-28 Data clustering is a highly interdisciplinary field the goal of which is to divide a set of objects into homogeneous groups such that objects in the same group are similar and objects in different groups are quite distinct Thousands of theoretical papers and a number of books on data clustering have been published over the past 50 years However few books exist to teach people how to implement data clustering algorithms This book was written for anyone who wants to implement or improve their data clustering algorithms Using object oriented design and programming techniques Data Clustering in C exploits the commonalities of all data clustering algorithms to create a flexible set of reusable classes that simplifies the implementation of any data clustering algorithm Readers can follow the development of the base data clustering classes and several popular data clustering algorithms Additional topics such as data pre processing data visualization cluster visualization and cluster interpretation are briefly covered This book is divided into three parts Data Clustering and C Preliminaries A review of basic concepts of data clustering the unified modeling language object oriented programming in C and design patterns A C Data Clustering Framework The development of data clustering base classes Data Clustering Algorithms The implementation of several popular data clustering algorithms A key to learning a clustering algorithm is to implement and experiment the clustering algorithm Complete listings of classes examples unit test cases and GNU configuration files are included in the appendices of this book as well as in the downloadable resources The only requirements to compile the code are a modern C compiler and the Boost C libraries

**Simply Visual Basic 2008** Paul J. Deitel, Harvey M. Deitel, Greg J. Ayer, 2009 For introductory courses in Visual Basic Programming offered in departments of Information Technology Computer Science or Business Merging the concept of a lab manual with that of a conventional textbook the Deitels have crafted an innovative approach that enables students to learn programming while having a mentor like book by their side This best seller blends the Deitel tm signature Live Code tm Approach with their Application Driven tm methodology Students learn programming and Visual Basic by working through a set of applications Each tutorial builds upon previously learned concepts while learning new ones An abundance of self assessment exercises are available at the end of most chapters to reinforce key ideas This approach makes it possible to cover a wealth of programming constructs within the Visual Basic 2008 environment Key topics include Language Integrated Query LINQ Visual Programming Framework Class Library FCL Controls Buttons TextBoxes ListBoxes Timers ComboBoxes RadioButtons Menus Dialogs Event Handling Debugger Algorithms Control Structures Methods Random Number Generation Arrays Classes Objects Collections Mouse Keyboard Event Handling Strings Files Database Graphics Multimedia GUI Design and Web applications Deitel accomplishes this by making highly technical topics as simple as possible The Third Edition is fully updated for Visual Studio 2008 Visual Basic 2008 and NET 3 5
