The Game Tester's Guide to the Universe: The Simple Guide to Landing Gamer & Beta Tester Jobs Swaggy Beta, 2014-05-21 Discover How Becoming A Game Tester Can Turn Your Life Around Learn How You Can Earn up to 120 An Hour Or More By Playing Video Games Dear Game Lover Are you sick and tired of running around in circles are you frustrated because you haven't found the right answers to online success for yourself If you are suffering any of these situations then I have to tell you something very important Being able to make money online isn't as hard as it may seem Hey I'm not kidding There was a time when I too was frustrated I used to work for long hours just to make ends meet I hated the idea of getting up early only to get stuck in traffic bosses ordering me what to do and wasting my whole day in the office Then I step into online business and tried all kinds of those so called moneymaking systems but they just never seemed to work People were making money by getting me to do what they do I invested my hard earned money and in return I didn't even get the resources to get me off the ground Everything turned to be scam Finally after countless hours and thousands of dollars of research I discovered a very easy and fail proof method to reach financial freedom I do make money every single day in fact every hour No kidding I have discovered such an easy method that allows me to have all that I wished for in my long hour jobs but never actually got any Now I'm here To Share My Path to Success and Information with You Before I reveal my fool proof super easy money making method let me ask you a question Would you like to make a decent hourly rate just to play and test video games Isn't it's great If you are on this page it clearly shows you have a passion for video games And I strongly believe that if passion turns into profession the resultant is unlimited income So I advice you to Turn Your Passion into Your Profession You know over 200 game companies are willing to pay you just to test their games These companies want you to be a game tester and give them your advice on their developed games and in return they will pay you handsome sum of money I'm a living example of it It would be right if I say this is an era of Internet and Video Games Today the game industry is over a 60 billion business The companies that release their produced games with bugs in them will cause them a loss of millions of dollars And no good company will ever want that So they think it a good idea to pay hundreds of dollars to gamers just to point out the glitches in their games So they can release bug free games and customers will not return their games Okay imagine this You are a gamer and you buy a new video game that crashes every time your character shoots the enemy It is obvious that you will not like the game and will never recommend it to anyone else This will be a serious setback for the game company which had invested millions of dollars in the development of the game And when no one buy their games due to the bad word of mouth advertising the result is obvious they will lose millions Then What Are There Programmers For Well programmers are not gamers So they cannot find the bugs that a video game tester will If a company is paying you 50 an hour just to test video games for them that would otherwise ruin the game experience and quite possibly hurt their sales Then what's wrong in it Isn't it a good deal 5 Good Reasons Why Playing Video Games Is An
