Range Measurement Applications

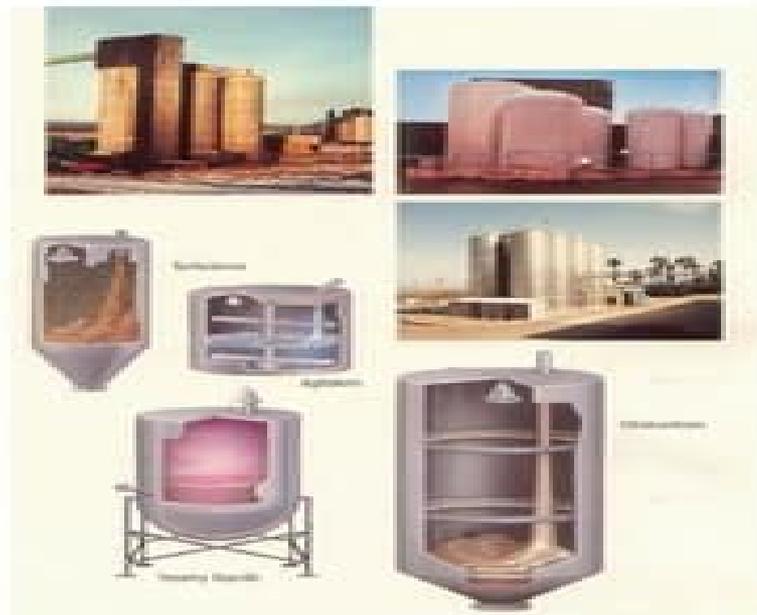

Figure 7.1: Industrial range measurement applications

Probably one of the greatest visions of the process industry has been a truly wire-and-rotate non-contact, non-intrusive continuous level measurement instrument, a single technology that can be used in every application, a device that is self-calibrating and maintenance-free, that is easy to install onto any vessel with any process connection. At the same time this device should offer an accuracy to within 1mm, it must be low-cost and capable of paying for itself in under three months while able to operate in excess of 20 years. *ISA Instrumentation and Control, May 1998*

Beyond the Kalman Filter: Particle Filters for Tracking Applications
Branko Ristic, Sanjeev Arulampalam, Neil Gordon, 2003-12-01 For most tracking applications the Kalman filter is reliable and efficient but it is limited to a relatively restricted class of linear Gaussian problems To solve problems beyond this restricted class particle filters are proving to be dependable methods for stochastic dynamic estimation Packed with 867 equations this cutting edge book introduces the latest advances in particle filter theory discusses their relevance to defense surveillance systems and examines defense related applications of particle filters to nonlinear and non Gaussian problems With this hands on guide you can develop more accurate and reliable nonlinear filter designs and more precisely predict the performance of these designs You can also apply particle filters to tracking a ballistic object detection and tracking of stealthy targets tracking through the blind Doppler zone bi static radar tracking passive ranging bearings only tracking of maneuvering targets range only tracking terrain aided tracking of ground vehicles and group and extended object tracking
