## Revision Notes

### Class- 7 Social Science(Geography)

#### Chapter 8 - Human-Environment Interactions: The Tropical and The Subtropical Region

There are more than seven billion lives on Earth. All of them are parts of the complete ecosystem. The earth's environment gives us our basic needs, and quite naturally, many of us have the same requirements as others for a living. These basic needs include food, cloth, and shelter. Therefore, despite our distinct appearance, characteristics, and cultures, we are all the same species. This is why human-environment interactions of the Tropical and Subtropical Regions of the planet are important for learning the various aspects of its wildlife, population, etc. In CBSE Class 7 Social Science Geography Chapter 8, you will be learning about these interactions in detail.

#### Life in the Amazon Basin

- From the map of the Amazon Basin, it is evident that the region lies very close to the planet's equator, between 10-degree North and 10-degree South.
- Due to its location, it's called the Equatorial region.
- The Amazon River flows through this region from the Western mountains to the Eastern Atlantic Ocean.
- The river has numerous tributaries.
- The Amazon Basin, formed by the Amazon River and its tributaries, covers large parts of Brazil, Bolivia, Columbia, Ecuador, Peru, and Venezuela. Its hot climate characterizes climate.

#### The climate in the Amazon Basin

- Since the region lies directly on the Earth's equator, its climate comprises primarily hot and humid weather.
- The climate remains simultaneously hot and wet during the year due to its location and sun ray's distribution.
- The days and the nights on the Amazon Basin are equally hot and humid.

# Chapter 8 Human Geography Test
