ANDREW VILLAGE Professor of Practical and Empirical Theology York St John University author of *The Church of England in the First Decade of the 21st Century* Here is a fascinating and engaging handbook every researcher in theology and religious studies should read and assimilate It fulfils a felt need by pooling the wealth of sociological methodologies and applying them to the scientific study of lived religion The author has done a unique service and his work will remain a point of reference for years

FELIX WILFRED Founder and Director of Asian Centre for Cross Cultural Studies Chennai editor of *The Oxford Handbook of Christianity in Asia* It is very good to see the use of social science methods being developed to aid religious studies and theological research My hope is that this very practical book using such up to date resources as Alan Bryman's *Social Research Methods* OUP now in its fifth edition will help to develop this important form of study further

ROBIN GILL Emeritus Professor of Applied Theology University of Kent author of the trilogy on *Sociological Theology* This volume fills an important gap in the field by bringing social scientific methods into theology and religious studies All parties in this conversation have much to gain from a sustained dialogue and this book moves us in that direction

JOHN BARTKOWSKI Professor Sociology University of Texas at San Antonio This is a valuable resource written in a way that theological students will understand and supervisors will appreciate It takes the student by the hand from the formulation of the research topic through methodological positioning and choices and closes with a chapter on supervision expectations I look forward to prescribing it to my own postgraduate students

NADINE BOWERS DU TOIT Professor Theology and Development University of Stellenbosch editor of *Race Faith and Inequality amongst Young Adults in South Africa* The highly readable yet exhaustive and authoritative text covers all aspects of the variety of methods available to contemporary scientists who either produce or evaluate empirical research The text is intended for students and scholars of theology and religious studies but anyone interested in how religion is practiced in different cultural contexts and want to understand individual lived experiences and interpretations will find this text an invaluable guide

RALPH W HOOD Jr Professor of Psychology University of Tennessee co editor of *Research in the Social Scientific Study of Religion* series Upon launching out on research students and scholars are always on the lookout for good books on research methodology In Dr Iyadurai's book they will find an excellent manual spanning the length and breadth of what they are looking for I strongly recommend this book to all those engaged in research

FRANCIS GONSALVES SJ President Jnana Deepa Pontifical Athenaeum of Philosophy Theology author of *God of Our Soil Towards Subaltern Trinitarian Theology* Joshua Iyadurai has been teaching research methods to PhD students in Christian Studies for over a decade He is an expert facilitator in this hybrid field helping both theology and religious studies students use social research methods more rigorously and effectively This book will be immensely helpful to anyone wanting to do research in the field of religion as well as to those in classes focused on research methods I highly recommend it

ROBERT K JOHNSTON Professor of Theology and Culture Fuller Theological Seminary co author of *Deep Focus Film and Theology in Dialogue* *Social Research Methods for Students and Scholars of Theology and Religious Studies* is a masterpiece

that draws from Joshua's experience of teaching social research for two decades. The book aims to catalyze theological scholarship using social research methods with scientific precision. Scholars, educators, and graduate students will find this text a welcome resource. I highly recommend it. DAVID TARUS, Executive Director, Association for Christian Theological Education in Africa (ACTEA), author of *A Different Way of Being*. *Assessing the Accuracy of Remotely Sensed Data*, Russell G. Congalton, Kass Green, 2002-01-01. Because the accuracy of remotely sensed data is critical to any successful mapping project, accuracy assessment is an important tool for anyone who uses remote sensing. This is a complete guide to assessing the accuracy of maps generated from remotely sensed data and the only book available that is devoted solely to this complex topic.

Climate Change Economics between Europe and China, Qing Pei, 2021-11-02. This book is the first attempt to highlight the Great Divergence between Europe and China from the perspective of environmental change. The author discusses the agrarian economy while considering the effects of climate change in both Europe and China at a long-term scale. The findings in the book supplement current knowledge and discussion on the Great Divergence across Eurasia. The book further aims to empirically review the climatic impacts on the human community in the past as the relevant historical reference by which to understand human nature linkages in the current Anthropocene epoch. The statistical analysis in the book will contribute to the development of relevant subjects such as environmental humanities, quantitative history, and historical geography. The book thus is suitable to all levels of students, undergraduate and postgraduate in the university. In summary, by combining multiple disciplines in both methods and knowledge, this book becomes an interesting reference to students, academic staff, and even the general public. It may also appeal to policymakers who aim to address the impacts of climate change according to past societal experiences.

Quantitative Research Methods in Communication, Erica Scharrer, Srividya Ramasubramanian, 2021-05-13. This textbook is an advanced introduction to quantitative methods for students in communication and allied social science disciplines that focuses on why and how to conduct research that contributes to social justice. Today's researchers are inspired by the potential for scholarship to make a difference for society to push toward more just and equitable ends and to engage in dialogue with members of the public so that they can make decisions about how to navigate the social, cultural, and political world equipped with accurate, fair, and up-to-date knowledge. This book illustrates the mechanics and the meaning behind quantitative research methods by illustrating each step in the research design process with research addressing questions of social justice. It provides practical guidance for researchers who wish to engage in the transformation of structures, practices, and understandings in society through community and civic engagement and policy formation. It contains step-by-step guidance in quantitative methods from conceptualization through all the stages of execution of a study, including providing a detailed guide for statistical analysis and demonstrating how researchers can engage with social justice issues in systematic, rigorous, ethical, and meaningful ways. This text serves as a core or supplementary textbook for graduate and advanced undergraduate courses in research methods for communication.

and social sciences and fills a gap for a methods text that is responsive to the desire of scholars to conduct socially impactful research

Analyzing Inequalities Catherine E. Harnois, 2017-01-30 *Analyzing Inequalities: An Introduction to Race, Class, Gender, and Sexuality Using the General Social Survey* is a practical resource for helping students connect sociological issues with real world data in the context of their first undergraduate sociology courses. This worktext introduces readers to the GSS, one of the most widely analyzed surveys in the U.S., and examines a range of GSS questions related to social inequalities and demonstrates basic techniques for analyzing this data online. No special software is required; the exercises can be completed using the Survey Documentation and Analysis (SDA) website at the University of California Berkeley, which is easy to navigate and master. Students will come away with a better understanding of social science research and will be better positioned to ask and answer the sociological questions that most interest them.

The Practice of Statistics for Business and Economics David S. Moore, George P. McCabe, Layth C. Alwan, Bruce A. Craig, William M. Duckworth, 2010-09-15 This innovative textbook is designed to give students the tools they need to make data-informed real world business decisions practically from the first day of class, providing a foundation in data production and interpretation that supports their work throughout the course. Newly retitled *The Practice of Statistics for Business and Economics* to reflect the true scope of its coverage, this new third edition of the text is its most accomplished yet: a conceptually rich, mathematically accessible survey of basic statistical methods in a business/economics context that emphasizes working with data and mastering statistical reasoning.

An Introduction to Agent-Based Modeling Uri Wilensky, William Rand, 2015-04-03 A comprehensive and hands-on introduction to the core concepts, methods, and applications of agent-based modeling, including detailed NetLogo examples. The advent of widespread fast computing has enabled us to work on more complex problems and to build and analyze more complex models. This book provides an introduction to one of the primary methodologies for research in this new field of knowledge: agent-based modeling. ABM offers a new way of doing science by conducting computer-based experiments. ABM is applicable to complex systems embedded in natural, social, and engineered contexts across domains that range from engineering to ecology. *An Introduction to Agent-Based Modeling* offers a comprehensive description of the core concepts, methods, and applications of ABM. Its hands-on approach, with hundreds of examples and exercises using NetLogo, enables readers to begin constructing models immediately, regardless of experience or discipline. The book first describes the nature and rationale of agent-based modeling, then presents the methodology for designing and building ABMs, and finally discusses how to utilize ABMs to answer complex questions. Features in each chapter include step-by-step guides to developing models in the main text, text boxes with additional information and concepts, end-of-chapter explorations and references, and lists of relevant reading. There is also an accompanying website with all the models and code.
