Nilson,Ludwika A. Goodson,2017-11-08 Bring pedagogy and cognitive science to online learning environments Online Teaching at Its Best A Merger of Instructional Design

with Teaching and Learning Research is the scholarly resource for online learning that faculty instructional designers and administrators have long been awaiting Over 70 percent of degree granting institutions offer online classes and while technical resources abound the courses often fall short of integrating the best practices in online pedagogy even if they comply with online course design standards Typically these standards omit the best practices in teaching and learning and the principles from cognitive science leaving students struggling to keep the pace understand the material and fulfill their true potential as learners This book fills the gap providing evidence based practices for online teaching online course design and online student motivation integrated with pedagogical and cognitive science to help you build the distance learning courses and programs your students deserve As more and more students opt for distance learning it s up to designers and instructors to rethink traditional methods and learn to work more effectively within the online learning environment and up to administrators to provide the needed leadership Online Teaching at Its Best provides practical real world advice grounded in educational science to help online instructors instructional designers and administrators deliver an exceptional learning experience Adopt new pedagogical techniques designed specifically for online learning environments Ensure strong course alignment and effective student learning for online classes Increase student retention build necessary support structures and train faculty more effectively Integrate research based course design and cognitive psychology into graduate or undergraduate programs Distance is no barrier to a great education what do stand in the way are inadequate online course design and implementation and deficient faculty training and support all of which administrators can mitigate Online Teaching at Its Best will help you ensure that your online classes measure up to the rigor and quality of excellence in teaching and assessment build in the personal touch for developing a learning community and equip your students to succeed in the next challenge Handbook of Research on Interdisciplinarity Between Science and Mathematics in Education

Cavadas, Bento, Branco, Neusa, 2023-01-24 Working in an interdisciplinary manner is long pursued but a difficult goal of science and mathematics education The interdisciplinarity of science and mathematics can occur when connections between those disciplines are identified and developed These connections could be expressed in the educational policies curriculum or in the science and mathematics teachers educational practices Sometimes those connections are scarce but in other moments full integration is achieved The Handbook of Research on Interdisciplinarity Between Science and Mathematics in Education presents results of good practices and interdisciplinary educational approaches in science and mathematics It presents a broad range of approaches for all educational levels from kindergarten to university Covering topics such as computer programming mathematics in environmental issues and simple machines this major reference work is an excellent resource for administrators and educators of both K 12 and higher education government officials pre service teachers teacher educators librarians researchers and academicians **Indian National Bibliography** B. S. Kesavan, 2017 **How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and**

Practice Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere. And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever. Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance. Relevant research in cognitive science has revealed possible limitations in online learning. For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure. Learners may experience cognitive overload, metacognitive illusion and low learning efficiency in self regulated learning. It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning. Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden. Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model.
