2018 Commission Work Programme European Commission:

The Politics of the European Union Herman Lievelde, Sebastiaan Princen, 2023-04-20 The European Union is a key player in determining policies and politics in Europe and yet understanding how it works remains a challenge The Politics of the European Union introduces students to its functioning by showing the similarities and differences between the EU and national political systems Fully revised and updated in its third edition this introductory textbook uses the tools of comparative politics to explore the history theories institutions key actors politics and policy making of the EU This comparative approach enables students to apply their knowledge of domestic politics and broader debates in political science to better understand the EU Numerous real world examples guide students through the textbook and chapter briefings fact files and controversy boxes highlight the important and controversial issues in EU politics A companion website features free Navigating the EU exercises to guide students in their analysis of EU policy making *EU Law of Economic & Monetary Union* Fabian Amtenbrink, Christoph Herrmann, 2020-05-21 Presenting a sweeping analysis of the legal foundations institutions and substantive legal issues in EU monetary integration The EU Law of Economic and Monetary Union serves as an authoritative reference on the legal framework of European economic and monetary union The book opens by setting out the broader contexts for the European project historical economic political and regarding the international framework It goes on to examine the constitutional architecture of EMU the main institutions and their legal powers the core legal provisions of monetary and economic union and the relationship of EMU with EU financial market and banking regulation The concluding section analyses the current EMU crisis and the main avenues of future reform **Transnational Solidarity** Helle Krunke, Hanne Petersen, Ian Manners, 2020-07-09 The book analyses the concept and conditions of transnational solidarity its challenges and opportunities drawing on diverse disciplines as Law Political Science Sociology Philosophy Psychology and History In the contemporary world we see two major opposing trends The first involves nationalistic and populist movements Transnational solidarity has been under pressure for a decade because of among others global economic and migration crises leading to populist and authoritarian leadership in some European countries the United States and Brazil Countries withdraw from international commitments on climate trade and refugees and the European Union struggles with Brexit The second trend partly a reaction to the first is a strengthened transnational grass root community a cosmopolitan movement which protests primarily against climate change Based on interdisciplinary reflections on the concept of transnational solidarity its challenges and opportunities are analysed drawing on Europe as a focal case study for a broader global perspective *Bank Politics* David Howarth, Scott James, 2022-11-03 The problem of banks being too big to fail was the defining regulatory issue of the global financial crisis However attempts to tackle the problem by separating retail banking from higher risk trading activities known as structural reform proved to be highly divisive and contributed to significant regulatory divergence In this book David Howarth and Scott James explain this variation by examining the politics

of bank structural reform across six key jurisdictions the United States the European Union the United Kingdom France Germany and the Netherlands Integrating political economy and public policy approaches they develop a novel comparative financial power framework to analyse how financial industry influence is mediated by two factors first whether bank lobbying is unified and centralized cooperative financial power or divided and fragmented competitive financial power and second policy makers use of venue shifting to depoliticize contentious policy issues The book explains that the US and UK governments implemented major reforms because the banking industry was divided and faced significant opposition However venue shifting to an independent committee led to durable reform in the UK while political polarization in the US contributed to contested reform By contrast the French and German governments balanced unified bank lobbying and political pressures to act by pursuing limited symbolic reforms the Dutch government deflected the issue through delegation to multiple commissions no reform while political stalemate at the EU level resulted from early venue shifting and concerted pan European bank lobbying The book makes a major contribution to scholarship on the political economy of finance and business power

The Role of Social Partners in Managing Europe's Great Recession Bernhard Ebbinghaus, J. Timo Weishaupt, 2021-07-29 This comprehensive study of the Great Recession and its consequences provides comparative analyses of the extent to which social concertation between government unions and employers varied over time and across European countries This edited volume a collaboration of international country experts includes eight in depth country case studies and analysis of European level social dialogue Further comparisons explore whether social concertation followed economic necessity was dependent on political factors or rather resulted from labour's power resources The importance of social partners involvement is again evident during the Covid 19 pandemic Examining contemporary crises the book will be of considerable interest to scholars and students of public and social policies comparative political economy and industrial relations and more broadly to those following European and EU politics
