**Adaptive Modelling, Estimation and Fusion from Data** Chris Harris,Xia Hong,Qiang Gan,2011-03-30      **Adaptive Modelling, Estimation and Fusion from Data** Chris Harris,Xia Hong,Qiang Gan,2012-10-05 In a world of almost permanent and rapidly increasing electronic data availability techniques of filtering compressing and interpreting this data to transform it into valuable and easily comprehensible information is of utmost importance One key topic in this area is the capability to deduce future system behavior from a given data input This book brings together for the first time the complete theory of data based neurofuzzy modelling and the linguistic attributes of fuzzy logic in a single cohesive mathematical framework After introducing the basic theory of data based modelling new concepts including extended additive and multiplicative submodels are developed and their extensions to state estimation and data fusion are derived All these algorithms are illustrated with benchmark and real life examples to demonstrate their efficiency Chris Harris and his group have carried out pioneering work which has tied together the fields of neural networks and linguistic rule based algorithms This book is aimed at researchers and scientists in time series modeling empirical data modeling knowledge discovery data mining and data fusion      *Handbook of Research on Advanced Wireless Sensor Network Applications, Protocols, and Architectures* Ray, Niranjana K.,Turuk, Ashok Kumar,2016-08-01 The implementation of wireless sensor networks has wide ranging applications for monitoring various physical and environmental settings However certain limitations with these technologies must be addressed in order to effectively utilize them The Handbook of Research on Advanced Wireless Sensor Network Applications Protocols and Architectures is a pivotal reference source for the latest research on recent innovations and developments in the field of wireless sensors Examining the advantages and challenges presented by the application of these networks in various areas this book is ideally designed for academics researchers students and IT developers

**Interdisciplinary Mechatronics** M. K. Habib,J. Paulo Davim,2013-05-06 Mechatronics represents a unifying interdisciplinary and intelligent engineering science paradigm that features an interdisciplinary knowledge area and interactions in terms of the ways of work and thinking practical experiences and theoretical knowledge Mechatronics successfully fuses but is not limited to mechanics electrical electronics informatics and intelligent systems intelligent control systems and advanced modeling intelligent and autonomous robotic systems optics smart materials actuators and biomedical and biomechanics energy and sustainable development systems engineering artificial intelligence intelligent computer control computational intelligence precision engineering and virtual modeling into a unified framework that enhances the design of products and manufacturing processes Interdisciplinary Mechatronics concerns mastering a multitude of disciplines technologies and their interaction whereas the science of mechatronics concerns the invention and development of new theories models concepts and tools in response to new needs evolving from interacting scientific disciplines The book includes two sections the first section includes chapters introducing research advances in mechatronics engineering and the

second section includes chapters that reflect the teaching approaches, theoretical projects and laboratories and curriculum development for under and postgraduate studies. Mechatronics engineering education focuses on producing engineers who can work in a high technology environment, emphasize real world hands on experience and engage in challenging problems and complex tasks with initiative, innovation and enthusiasm.

**Intelligent Control Systems Using Computational Intelligence Techniques** A.E. Ruano,2005-07-18 Intelligent Control techniques are becoming important tools in both academia and industry Methodologies developed in the field of soft computing such as neural networks fuzzy systems and evolutionary computation can lead to accommodation of more complex processes improved performance and considerable time savings and cost reductions Intelligent Control Systems using Computational Intelligence Techniques details the application of these tools to the field of control systems Each chapter gives an overview of current approaches in the topic covered with a set of the most important references in the field and then details the author's approach examining both the theory and practical applications *Knowledge-Based Intelligent Information and Engineering Systems* Vasile Palade,2011-04-08 2 1 Text Summarization Text summarization is the process of distilling the most important information from a source or sources to produce an abridged version for a particular user or users and task or tasks 3 Basic and classical articles in text summarization appear in *Advances in automatic text summarization* 3 A literature survey on information extraction and text summarization is given by Zechner 7 In general the process of automatic text summarization is divided into three stages 1 analysis of the given text 2 summarization of the text 3 presentation of the summary in a suitable output form Titles abstracts and keywords are the most common summaries in Academic papers Usually the title the abstract and the keywords are the first second and third parts of an Academic paper respectively The title usually describes the main issue discussed in the study and the abstract presents the reader a short description of the background the study and its results A keyword is either a single word unigram e.g. learning or a collocation which means a group of two or more words representing an important concept e.g. machine learning natural language processing Retrieving collocations from text was examined by Smadja 5 and automatic extraction of collocations was examined by Kita et al 1 **Fuzzy Logic, Soft Computing and Computational Intelligence** ,2005 [Handbook of Dynamic Data Driven Applications Systems](#) Frederica Darema,Erik P.
