Mohamed Ridda Laouar,Valentina Emilia Balas,Vincenzo Piuri,Dana Rad,Zineb Touati Hamad,Abbas Cheddad,2024-08-27

This book covers the Proceedings of the 13th International Conference on Information Systems and Advanced Technologies ICISAT 2023 One of the evocative and valuable dimensions of this conference is the way it brings together researchers scientists academics and engineers in the field from different countries and enables discussions and debate of relevant issues challenges opportunities and research findings The ICISAT 2023 conference provided a forum for research and developments in the field of information systems and advanced technologies and new trends in developing information systems organizational aspects of their development and intelligent aspects of the final product The aim of the ICISAT 2023 is to report progress and development of methodologies technologies planning and implementation tools and standards in information systems technologies and sciences ICISAT 2023 aims at addressing issues related to the intelligent information data science and decision support system from multidisciplinary perspectives and to discuss the research teaching and professional practice in the field The book of ICISAT 2023 includes selected papers from the 13th International Conference on Information Systems and Advanced Technologies ICISAT 2023 organized during December 29 30 2023 In this book researchers professional software and systems engineers from around the world addressed intelligent information data science and decision support system for the conference The ideas and practical solutions described in the book are the outcome of dedicated research by academics and practitioners aiming to advance theory and practice in this research domain The list of topics is in all the areas of modern intelligent information systems and technologies such as neural networks evolutionary computing adaptive systems pervasive system ubiquitous system E learning and teaching knowledge based paradigms learning paradigms intelligent data analysis intelligent decision making and support system intelligent network security web intelligence deep learning natural language processing image processing general machine learning and unsupervised learning

Advances in Additive Manufacturing Technologies P Gurusamy,2024-11-25

We are delighted to present the proceedings of the 5th International Conference on Advances in Additive Manufacturing Technologies ICAAMT 2023 This conference serves as a premier forum for researchers practitioners and industry experts to share their latest findings innovations and insights in the field of additive manufacturing The rapid advancements and the increasing adoption of these technologies across various sectors underscore the importance of this gathering The conference was held from

November 27-29, 2023 in Chennai, India and organized by the Department of Mechanical Engineering, Chennai Institute of Technology, Chennai, India. Precision and Intelligence in Agriculture: Advanced Technologies for Sustainable Farming Whig, Pawan, Elngar, Ahmed, 2025-06-19. The integration of advanced technologies enables farmers to optimize resources and make more informed decisions. This shift toward smart farming not only enhances productivity and profitability but also supports sustainability by reducing waste, conserving water, and minimizing chemical inputs. As the agricultural sector faces the dual challenge of feeding a rising population and combating climate change, precision and intelligent technologies represent a vital path forward for resilient and responsible farming practices. *Precision and Intelligence in Agriculture: Advanced Technologies for Sustainable Farming* explores the way artificial intelligence and other technologies have transformed the agricultural sector. It further discusses how these technologies can be used in support of sustainable farming. Covering topics such as agriculture 4.0, hydroponics, and precision agriculture, this book is an excellent resource for academics, policymakers, and researchers.

*Predicting, Preventing, and Mitigating Natural Disasters Through Advanced Technologies* Sajib, Shahriar, Noor, Asif, 2026-02-25. Over the past decade, extreme natural disasters have imposed escalating human and economic tolls. Advances in data-driven artificial intelligence (AI) now offer the potential to extend forecast lead times and improve predictive accuracy, while innovations in unmanned aerial vehicles (UAVs) and robotics can bolster our capacity to mitigate and respond. By harnessing these technologies, it is reasonable to expect that humanity will develop the tools needed to prevent or at least dramatically reduce the impact of future natural disasters. *Predicting, Preventing, and Mitigating Natural Disasters Through Advanced Technologies* confronts the most destructive natural phenomena by systematically reviewing today's state of the art predictive and preventive technologies. Each chapter provides an in-depth analysis of a specific hazard, examining how data-driven forecasting models, early warning systems, and emerging drone and robotics-based interventions currently function, where they fall short, and what incremental advances could sharpen our ability to anticipate and avert catastrophe. Covering topics such as disaster risk reduction, cyclone readiness evaluation, and landslide susceptibility mapping, this book is an excellent resource for researchers and graduate students, disaster management engineers and technologists, policymakers, and planners, non-profit and aid organizations, and more.
