Field-Programmable Logic and Applications Will Moore, Wayne Luk, 1995-08-21 This volume constitutes the proceedings of the Fifth International Workshop on Field Programmable Logic and Its Applications FPL 95 held in Oxford UK in August-September 1995 The volume presents 46 full revised papers carefully selected by the program committee from a large number and wide range of submissions The papers document the progress achieved since the predecessor conference see LNCS 849 They are organized in sections on architectures platforms tools arithmetic and signal processing embedded systems and other applications and reconfigurable design and models *Applied Reconfigurable Computing. Architectures, Tools, and Applications* Nikolaos Voros, Michael Huebner, Georgios Keramidas, Diana Goehringer, Christos Antonopoulos, Pedro C. Diniz, 2018-04-25 This book constitutes the proceedings of the 14th International Conference on Applied Reconfigurable Computing ARC 2018 held in Santorini Greece in May 2018 The 29 full papers and 22 short presented in this volume were carefully reviewed and selected from 78 submissions In addition the volume contains 9 contributions from research projects The papers were organized in topical sections named machine learning and neural networks FPGA based design and CGRA optimizations applications and surveys fault tolerance security and communication architectures reconfigurable and adaptive architectures design methods and fast prototyping FPGA based design and applications and special session research projects

IEEE International Conference on Electronics, Circuits and Systems, 1999 **JavaTech, an Introduction to Scientific and Technical Computing with Java** Clark S. Lindsey, Johnny S. Tolliver, Thomas Lindblad, 2005-10-13 JavaTech is a practical introduction to the Java programming language with an emphasis on the features that benefit technical computing After presenting the basics of object oriented programming in Java it examines introductory topics such as graphical interfaces and thread processes It goes on to review network programming and develops Web client server examples for tasks such as monitoring remote devices The focus then shifts to distributed computing with RMI Finally it examines how Java programs can access the local platform and interact with hardware Topics include combining native code with Java communication via serial lines and programming embedded processors An extensive web site supports the book with additional instructional materials JavaTech demonstrates the ease with which Java can be used to create powerful network applications and distributed computing applications It will be used as a textbook for programming courses and by researchers who need to learn Java for a particular task *Embedded Microprocessor System Design using FPGAs* Uwe Meyer-Baese, 2025-05-29 This textbook for courses in Embedded Systems introduces students to necessary concepts through a hands on approach It gives a great introduction to FPGA based microprocessor system design using state of the art boards tools and microprocessors from Altera Intel and Xilinx HDL based designs soft core parameterized cores Nios II and MicroBlaze and ARM Cortex A9 design are discussed compared and explored using many hand on designs projects Custom IP for HDMI coder Floating point operations and FFT bit swap are developed implemented tested and speed up is measured

New additions in the second edition include bottom up and top down FPGA based Linux OS system designs for Altera Intel and Xilinx boards and application development running on the OS using modern popular programming languages Python Java and JavaScript HTML CSSs Downloadable files include all design examples such as basic processor synthesizable code for Xilinx and Altera tools for PicoBlaze MicroBlaze Nios II and ARMv7 architectures in VHDL and Verilog code as well as the custom IP projects For the three new OS enabled programming languages a substantial number of examples ranging from basic math and networking to image processing and video animations are provided Each Chapter has a substantial number of short quiz questions exercises and challenging projects *Field-programmable Logic and Applications* ,2000
