An Optimization-Based Approach for Continuous Map Generalization Dongliang Peng, 2019-05-29 Maps are the main tool to represent geographical information Users often zoom in and out to access maps at different scales Continuous map generalization tries to make the changes between different scales smooth which is essential to provide users with comfortable zooming experience In order to achieve continuous map generalization with high quality we optimize some important aspects of maps In this book we have used optimization in the generalization of land cover areas administrative boundaries buildings and coastlines According to our experiments continuous map generalization indeed benefits from optimization
