Religious Activism in the Global Economy Sabine Dreher, Peter J. Smith, 2016-06-01 Protests of neoliberal globalization have proliferated in recent years not least in response to the financial crisis austerity and increasing inequality But how do religious groups organize themselves in response to these issues This book systematically studies the relationship of religious activism towards neoliberal globalization It considers how religious organizations often play a central role in the resistance against global capitalism endeavouring to offer alternatives and developments for reform But it also examines the other side of the coin showing how many religious groups help to diffuse neoliberal values promote and reinforce practices of capitalism Drawing on a unique set of case studies from around the world the chapters examine a range of groups and their practices in order to provide a thorough examination of the relationship between religion and the global political economy **Rest Area 178: Welcome to Umm, Heaven** Waribashi, 2022-01-02 Ogiwara Hajime is one of 250 regular high school students thrown into a place called Rest Area 178 For some reason he has no shoes but is still wearing his high school uniform He thinks it's a joke until an orange haired JK in high heels who calls herself the Senpai points a gun at him and tells him that he has to get a weapon and fight in a battlefield The winner gets to attend the high school reunion But he hasn't even graduated Ogiwara misses his girlfriend and is terrible at fighting but there is no way to leave The weapons are all sold out and one of the other students seems to be a psychopath **Neverending Stories** R. Lyle Skains, 2022-12-29 Winner of the 2023 N Katherine Hayles Award for Criticism of Electronic Literature Digital fiction has long been perceived as an experimental niche of electronic literature Yet born digital narratives thrive in mainstream culture as communities of practice create and share digital fiction filling in the gaps between the media they are given and the stories they seek Neverending Stories explores the influences of literature and computing on digital fiction and how the practices and cultures of each have impacted who makes and plays digital fiction Popular creativity emerges from subordinated groups often excluded from producing cultural resources accepting the materials of capitalism and inverting them for their own carnivalesque uses Popular digital fiction goes by many different names webnovels adventure games visual novels Twitter fiction webcomics Twine games walking sims alternate reality games virtual reality films interactive movies enhanced books transmedia universes and many more The book establishes digital fiction in a foundation of innovation tracing its emergence in various guises around the world It examines Infocom whose commercial success with interactive fiction crumbled in no small part because of its failure to consider women as creators or consumers It takes note of the brief flourish of commercial book apps and literary games It connects practices of cognitive and conceptual interactivity and textual multiplicity dating to the origins of the print novel to the feminine It pushes into the technological future of narrative in immersive and mixed realities It posits the transmedia franchises and the practices of fanfiction as examples of digital fiction that will continue indefinitely regardless of academic notice or approval Memory and Recovery in Times of Crisis Fiona Larkan, Fiona Murphy, 2017-11-09 This book presents a

social scientific reading of the challenges of memory and recovery in times of crisis Drawing on different interpretations of what constitutes crisis this collection uses lenses of economics identity and commemoration to question how memory and recovery is being constituted through larger discourses of political claims of moving forward healing and identity Memory and Recovery in Times of Crisis examines how memory is dis or re interred through social processes and further how recovered memories are challenged or legitimized It also presents a set of questions that will stimulate further reflections on what kind of role understandings of memory of crisis can play in recovery Given the world we find ourselves living in in 2017 a world subject to multiple intersecting crises how we understand the dynamics of memory and recovery is a pressing issue indeed This book will appeal to both scholars and students of anthropology and sociology
