Abstract

Nigerian English newspaper headlines have been examined mostly from stylistic, pragmatic, critical discourse analytic and critical linguistic perspective but not from a syntactic perspective in terms of lexical and functional heads. This study, therefore, examines lexical and functional heads in Nigerian newspaper headlines. The data for this study were collected from Nigerian national newspapers including 'The Punch', 'The Nation', 'Nigerian Tribune', 'Vanguard' and 'The Sun'. The study uses the X-bar theory of Generative Grammar to syntactically analyze the data. It is discovered that both lexical and functional heads are projected in Nigerian newspaper headlines. However, their representation depends on the syntactic configuration of the headlines. Sentence type headlines have more heads than phrasal headlines. While both heads occur in the headlines, lexical heads have more projection than functional heads.

1. Introduction

Today, newspapers are widely read by a good number of people across the world. In the Nigerian society, a lot of people, most especially the elite, read the newspapers to get adequate updates concerning events and happenings in the society. Consequently, this has led to the evolution of a plethora of more newspapers in the country over the years. Also, these newspapers are characterized by headlines which project the gist of the stories and events in them. Newspaper headlines are often constructed in certain structures to specifically capture the highlights of news and stories in the newspapers. The headlines are often constructed to capture the interest of the readers since they determine whether people will eventually read the stories in the newspaper. Ungerer (2000: 48) notes that 'a headline describes news story in a few words, informs quickly and accurately and arouses the readers' curiosity'. Similarly, Tiono (2003) argues that in order to attract readers' attention, journalists make the headlines

Adverb Licensing and Clause Structure in English Dagmar Haumann,2007-03-07 This monograph provides an in depth investigation of the structural integration and the licensing of adverbs in relation to clause structure with special emphasis on the structural implementation of the relation between the position and interpretation of adverbs The book substantiates the hypothesis that the licensing of adverbs within and across the three layers of the clause is contingent on specifier head agreement and that variation in the linear order of adverbs and other elements of the clause follows from the interplay of a small number of factors The central claims made are functional projections hosting adverbs are not confined to the inflectional and complementizer layer of the clause but also play a central role in the shaping of the lexical layer postverbal adverbs are realized within a semantically empty verbal projection and licensed under specifier head agreement by proxy and adverbs that occur within the complementizer layer of the clause do so by either move or merge The Cambridge Handbook of Korean Linguistics Sungdai Cho,John Whitman,2022-08-25 The Korean wave in music and film and Korea s rise to become the twelfth economic power in the world have boosted the world wide popularity of Korean language study The linguistic study of Korean with its rich syntactic and phonological structure complex writing system and unique socio historical context is now a rapidly growing research area Contributions from internationally renowned experts on the language provide a state of the art overview of key current research in Korean language and linguistics Chapters are divided into five thematic areas phonetics and phonology morphology and syntax semantics and pragmatics sociolinguistics and psycholinguistics and language pedagogy The Handbook includes cross linguistic data to illuminate the features of Korean and examples in Korean script making it suitable for advanced students and researchers with or without prior knowledge of Korean linguistics It is an essential resource for students and researchers wishing to explore the exciting and rapidly moving field of Korean linguistics **The Syntax of Italian Dialects** Christina Tortora,2003-07-03 This volume collects original theoretical work on the syntax and morphology of Italian and a wide range of Italian dialects It contains contributions by such leading figures as Cecilia Poletto Guglielmo Cinque and Richard Kayne and examines topics such as the syntax of ne the internal structure of personal pronouns the syntax morphology interface and functional projections at the clausal level **Grammaticalization and Language Change in Chinese** Xiu-Zhi Zoe Wu,2004-08-02 This innovative study on the phenomenon of grammaticalization and its manifestation in Chinese provides new insights into language change in Chinese and a large number of grammatical topics Grammaticalization occurs in all of the world s languages Xiu Zhi Zoe Wu demonstrates general linguistic principles present and active in the phenomenon of grammaticalization whilst also describing the modelling of language in formal theoretical approaches to syntax so this book fills two major gaps in the current study of linguistics Grammaticalization and Language Change in Chinese illuminates how studies of language development and change provide special insights into the understanding of current synchronic systems of language Using patterns from

Semi-lexical Categories Norbert Corver,Henk van Riemsdijk,2013-05-22 The distinction between functional categories and lexical categories is at the heart of present day grammatical theory in theories on language acquisition code switching and aphasia At the same time it has become clear however that there are many lexical items for which it is less easy to decide whether they side with the lexical categories or the functional ones This book deals with the grammatical behavior of such in between categories which are referred to here as semi lexical categories **Perspectives on Phrase Structure: Heads**

and Licensing Susan Rothstein, 2020-01-13 This book explores licensing theory and its implications for a theory of syntax. It brings together a series of new papers which focus on developing a constrained set of licensing mechanisms relating elements in a syntactic representation and on the different properties of lexical and functional heads as licenses of complements and specifiers. Directed toward an audience of syntacticians and those interested in the applications of syntactic theory, it demonstrates the expanding explanatory parts of this approach to syntax. *Clinical Linguistics & Phonetics*, 1993

The New Comparative Syntax Liliane M. V. Haegeman, 1997 Drawing upon recent theoretical developments and empirical discoveries, this book provides a coherent and comprehensive introduction to generative research in this field. Dr. Haegeman brings together ten chapters to illustrate the new approach to comparative grammar which has developed against the background of the principles and parameters model. The contributors show how this framework guides empirical research by seeking to reveal the underlying grammatical basis for similarities and differences between languages and language groups. Throughout the text, attention is drawn to the ways in which empirical study feeds into theory construction, raising new questions for the overall conceptual framework and sometimes providing new solutions. *Unaccusative Syntax in Russian* Stephanie Annemarie Harves, 2003

In this volume, some of the most influential linguists who have participated in this long-lasting debate offer their recent work in short, self-contained case studies.

Restructuring and Functional Heads Guglielmo Cinque, 2006-02-02 Collects the articles of Guglielmo Cinque of the University of Venice. This book is divided into two sections: the first on restructuring, a central topic in Romance syntax and with connections to other language groups as well; the second part focuses on the consequences of treating clausal functional heads as members of a universal hierarchy.
