## Isaac Newton James Gleick:

Isaac Newton James Gleick, 2003 James Gleick has long been fascinated by the making of science how ideas order visible appearances how equations can give meaning to molecular and stellar phenomena how theories can transform what we see In *Chaos* he chronicled the emergence of a new way of looking at dynamic systems in *Genius* he portrayed the wondrous dimensions of Richard Feynman's mind Now in *Isaac Newton* he gives us the story of the scientist who above all others embodied humanity's quest to unveil the hidden forces that constitute the physical world In this original sweeping and intimate biography Gleick moves between a comprehensive historical portrait and a dramatic focus on Newton's significant letters and unpublished notebooks to illuminate the real importance of his work in physics in optics and in calculus He makes us see the old intuitive alchemical universe out of which Newton's mathematics first arose and shows us how Newton's ideas have altered all forms of understanding from history to philosophy And he gives us a moving account of the conflicting impulses that pulled at this man's heart his quiet longings his rage his secrecy the extraordinary subtleties of a personality that were mirrored in the invisible forces he first identified as the building blocks of science More than biography more than history more than science *Isaac Newton* tells us how through the mind of one man we have come to know our place in the cosmos

**Summary of James Gleick's *Isaac Newton*** Everest Media, 2022-07-02T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The Woolsthorpe farmhouse was the home of Newton's ancestors for just twenty years It was a manor and the fatherless boy was its lord with seigniorial authority over a handful of tenant farmers in nearby cottages 2 When Isaac was old enough he began to walk to the village dame school where he learned to read and study the Bible He was small for his age lonely and abandoned He often wished his stepfather dead and his mother as well 3 Isaac was sent to boarding school when he was ten in 1653 He slept in the garret and carved his name into the boards He was lonely anxious and competitive He despaired He wanted to make an end 4 The sixteenth century was a time of information surfeit People heard new rumors every day and tried to make sense of them all Burton tried to assemble all previous knowledge into a single book *The Human Touch* Michael Frayn, 2008-01-22 Examines the role of humankind in the universe addressing such concepts as the existence of time and space relativity and language in terms of the question of what the universe would be like if human beings were not around to observe or interpret it *Dismantling the Master's Clock* Rasheedah Phillips, 2025-01-28 A radical new treatise on time quantum physics and racial justice from world renowned artist and advocate Rasheedah Phillips of Black Quantum Futurism *Dismantling the Master's Clock* is a groundbreaking debut work that synthesizes philosophy and the history of science with Black cultural traditions speculative fiction and Phillips's own art practice to argue for a more equitable access to time and the future While some processes like aging birth or car crashes seem to occur in only one direction of time by the apparent logic of the universe human consciousness should experience time both backwards and forwards Though past and present organize our lives like unarguable fact the physicists

who study time are much less certain Linear time is an illusion explains Rasheedah Phillips a construct even science contests It is based more on Western history and systems of social order than on nature or the variety of human existence Both indigenous African conceptions of time and quantum physics recognize how the past present and future act upon and modify each other Afrodiasporic identity is itself a time traveling phenomenon in which the past is always present Phillips unfurls time s legacy of racial oppression from maritime navigation for colonial expansion and the timekeeping methods of plantation overseers to the establishment of Greenwich Mean Time and the Western Scramble for Africa time has been a homogenizing project of the last few centuries Phillips unsettles dominant assumptions of space and time highlighting how Black communities have long subverted these through alternative temporal frameworks

**The Physics of Superheroes** James Kakalios,2005-09-29 James Kakalios explores the scientific plausibility of the powers and feats of the most famous superheroes and discovers that in many cases the comic writers got their science surprisingly right Along the way he provides an engaging and witty commentary while introducing the lay reader to both classic and cutting edge concepts in physics including What Superman s strength can tell us about the Newtonian physics of force mass and acceleration How Iceman s and Storm s powers illustrate the principles of thermal dynamics The physics behind the death of Spider Man s girlfriend Gwen Stacy Why physics professors gone bad are the most dangerous evil geniuses Isaac Newton ,1962
