Contemporary Insights And Transformative

Perspectives In Human Development: Review Papers, Critical Reflections And Emerging Paradigms Prof Dr Kamini
Prakash Rege,2025-07-18 The reviewed literature underscores the evolving and multifaceted nature of human development
in contemporary society Young adults today face complex relational technological and societal pressures that shape their
emotional psychological and social trajectories A prominent concern is the prevalence of dating abuse and psychological
manipulation often involving coercion emotional degradation and isolation which can result in lasting impacts on self esteem
and mental health Relatedly the experience of being ghosted reflects broader patterns of emotional unavailability and
normalization of abrupt relationship dissolution contributing to anxiety abandonment issues and mistrust Social media plays
a dual role in mental health discourse While it helps destigmatize psychological disorders the commodification and misuse of
diagnostic labels have led to widespread self diagnosis and misinformation This trivialization can obscure the severity of
genuine mental health conditions and reduce the perceived value of professional care Digital technologies and artificial
intelligence also significantly influence the development of children and adolescents While personalized learning and
educational gamification offer potential benefits they introduce concerns such as data privacy screen dependence
overstimulation and reduced face to face socialization Human development concerns are increasingly seen as lifelong Early
and pre retirement transitions for instance highlight the need for emotional and financial preparedness beyond youth Work
life balance emerges as another critical theme for younger populations High expectations and hypercompetitive
environments often result in chronic stress and burnout making balance a necessity for long term well being rather than a
luxury Across all themes the literature emphasizes the need for proactive interventions educational efforts and systemic
reform A holistic approach to human development considering emotional cognitive relational and digital dimensions is
essential Institutions educators families and policymakers must collaborate to build adaptive and resilient support systems
that reflect evolving developmental needs with empathy equity and evidence based strategies

Personal Sustainability Oliver Parodi, Kaidi Tamm, 2018-03-14

Transition to sustainability is stuck and academic research has not resulted in significant change so far A large void in sustainability research and the understanding of sustainable development is an important reason for this Personal Sustainability seeks to address this void opening up a whole cosmos of sustainable development that has so far been largely unexplored Mainstream academic economic and political sustainable development concepts and efforts draw on the macro level and tend to address external collective and global processes By contrast the human individual intra and inter personal aspects on the micro level are often left unaddressed The authors of Personal Sustainability invite the reader on a self reflecting journey into this unexplored inner cosmos of sustainable development focusing on subjective mental emotional bodily spiritual and cultural aspects Although these are intrinsically human aspects they have been systematically ignored by academia To establish this new field in sustainability research means to leave the common scientific paths and expand the horizon Together with authors from cultural studies philosophy anthropology psychology sociology psychiatry aesthetics and economics and supported by contributions from practitioners this book portrays different approaches to personal sustainability and reflects on their potentials and pitfalls paving the way to cultures of sustainability This book will be of great interest to researchers and students in the field of sustainability and sustainable development as well as researchers from philosophy anthropology psychology sociology cultural studies ethnology educational research didactics aesthetics economics business and public administration
